

# 2012 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

2012 Fruit Tree List			
Item	Description	Chill Hrs	Loc.
<b>ALMONDS</b>			
All In One	The #1 almond for home & orchard, this tree produces heavy crops. Its large crops tend to stunt the tree, making it a semi-dwarf. Medium to large soft shelled fruit, sweet kernels. Ripens Sept. to Oct. Self fruitful Semi-dwarf	500 hrs	P S
Garden Prince Dwarf	Compact growing, lushly foliated tree to about 10-12 feet tall. Soft kernels, especially sweet and tasty. Bears young and heavy. Large, light pink blooms in spring. Ripens Sept. to Oct. Self-fruitful. Semi-dwarf.	250 hrs	P
<b>APPLES</b>			
Anders EZ Pick	Med. to large, red striping over greenish yellow base. Crisp, white, sweet flesh. Eaten green, similar to Granny Smith. Eaten ripe, similar to Fuji.	Less than 500 hrs.	P
Anna	Remarkable apple for mild winter areas. Great in So. California. It bears large crops of sweet, crisp fruit. Good fresh or cooked. Ripens in June. Self-fruitful.	200 hrs.	P S
Anna Semi Dwarf	Same as above, just smaller growing	200 hrs.	P
Anna Espaliered	Same as Anna, but has several pre-formed horizontal branches.	200 hrs.	P S
Beverly Hills	Medium size fruit with yellow skin and red stripes. Crisp and juicy bears well in mild climate areas. Ripens late June Self-fruitful.	200 hrs.	S
Braeburn	Newer variety from New Zealand. Superb late season fruit, very crisp & tangy, more flavorful than Granny Smith. Excellent keeping apple. Green fruit with dark red blush. Ripens Oct. to Nov. Self-fruitful.	250 hrs	S
Dorset Golden	Outstanding sweet apple for warm winter areas. Firm, very flavorful, sweet like Golden Delicious. Yellow skin with an orange blush. Very low chill requirements. Ripens in June. Self-fruitful	100 hrs.	P S
Dorset Golden Dwarf	Same as above, just smaller growing 6-8ft	100 hrs.	P
Dorset Golden Espaliered	Same as above, but has several pre-formed horizontal branches	100 hrs.	P S
Fuji	One of the very best apples grown world wide. Firm, crunchy, juicy, white flesh. This apple has excellent flavor. It is also a very good keeping apple. This apple has become a favorite across the country its popularity grows every year. Ripens Sept. Self-fruitful.	300 hrs	P S
Fuji Semi Dwarf	Same as above, just smaller growing.	300 hrs.	P
Fuji Espaliered	Same as Fuji, but has several pre-formed horizontal branches	300 hrs.	P S
Fuji EZ Pick		300 hrs.	S

Highlighted entries are additions this year.

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2012 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Gala	Wonderful dessert apple from New Zealand. The fruit is crisp with a nice blend of sweetness and tartness. Wonderful rich flavor. The skin is reddish-orange over yellow. Adapts well to warm climates. Ripens in Aug. & Sept.	500 hrs.	P
Gordon	Popular low chill variety for So. Cal. Good for both fresh eating and cooking, self fruitful.		S
Gordon Semi-dwarf			P
Granny Smith Semi Dwarf	A newer variety from New Zealand. Large late, green all-purpose apple. Eating, cooking & sauce. Crisp, tart, excellent keeper. Prefers long summers, thrives in hot climates. The tree has prolonged blooms and is a good pollinizer of other apples. Ripens in Aug. & Sept. Self-fruitful.	500 hrs	P
Mollies Delicious EZ Pick	Large and excellent quality. Yellow with red blush. Pollinize with Fuji, Beverly Hills or Granny Smith.	400 hrs.	P
Mutsu (Crispin)	A favorite of connoisseurs, very large, crisp and flavorful. Skin is green with an orange blush. Flesh is white, coarse, firm, crisp, juicy and slightly acidic. Excellent flavor. Pick when green or wait till partly yellow. Pollen sterile - Pollinate with Red Delicious, Granny Smith, Fuji, or Gala. Ripens Late October.	500 hrs	S
Pink Lady (Crisps Pink)	Newer hot climate apple from Australia. Very crisp, sweet-tart distinct flavor. Good keeping apple. Skin is reddish-brown over green, with white stripe. White flesh resists browning. Ripens in Sept. Self-fruitful.	400 hrs	P S
Sundowner	Red sibling of Pink Lady apple. Low chill & excellent fresh, ripens late, after Pink Lady.		P S
4-on-1 Mild Climate Combo	Probably Fuji-Gala-Mutsu-Jonagold		S
4-on-1 Low Chill Combo	Probably Anna-Fuji-Dorset Golden-Gordon		P S
3-on-1 Low Chill, espaliered	Probably Anna-Dorset Golden-Fuji		P S
<b>APRICOT</b>			
Autumn Glo Semi Dwarf	A newer late season apricot with a sweet, slightly acid flavor. The fruit is good both fresh and dried. It is juicy and very aromatic. It will please the most critical of apricot lovers. Harvest is later, August. Self-fruitful.	300-400 hrs.	P S
Blenheim (Royal) Semi Dwarf	All purpose freestone, sweet, aromatic and very flavorful. Long time #1 apricot in Calif. It blooms early, good for canning and drying. This is a semi-dwarf tree to about 14' tall. Ripens in June & July. Self-fruitful.	400 hrs	P S
Blenheim (Royal) STD			P
Blenheim EZ Pick		400 hrs.	S

Highlighted entries are additions this year.

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2012 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Gold Kist, Semi Dwarf	Excellent back yard apricot for warm winter climates. Freestone and very good quality. Heavy bearing tree. Ripens in June. Self-fruitful.	300 hrs	P S
Katy EZ Pick	Large, all purpose flavorful apricot. Tree ripe fruit is not tart. A favorite for warm winter climates. One of the best apricots for our area. Ripens in June. Self-fruitful.	300 hrs	P
Katy Semi Dwarf	Same as above only smaller	300 hrs	P
Royal Rosa	Extremely vigorous, more disease resistant than other apricots. Bearing young & heavy especially nice fruit. Sweet, low acid and fine flavor. Very early harvest. Ripens in May & June. Self-fruitful.	500 hrs	P S
Tropic Gold	NEWER INTRODUCTION of a great new Apricot. This one does well in the warmer Southern California areas. The tree produces heavy crops which make the tree almost weeping. Bears young.	400 hrs	P S
4-on-1 Apricot	Tomcot-Katy-Blenheim-Flavor Delight-Royal Rosa		S
<b>CHERRIES</b>	<i>NOTE: Most Cherries need colder climates, coldest inland and canyons or mountains. Minnie Royal and Royal Lee are very low chill.</i>		
Compact Stella	Very compact tree with large fruit, very dark red, nearly black. Firm, sweet dark fresh with good flavor and texture. Resistant to cracking. This tree bears at a young age and is a good pollenizer for all sweet cherries. Self-fruitful.	400 hrs	P
English Morello	Late season sour cherry for baking		P
Lapins	Newer variety from Canada. Dark red, sweet cherry is large & firm. Self-fruitful.	400 hrs	P S
Minnie Royal	Yellow fruit with a pink blush	300 hrs	P S
Minnie Royal Semi Dwarf		300 hrs.	P S
Royal Lee	Large yellow cherry with more red blush than Rainier. Excellent flavor. Pollenizer required, grower suggests Minnie Royal or English Morello as possible pollenizers. Moderate chill hours.	300 hrs	P S
Royal Lee Semi Dwarf		300 hrs.	P S
Royal Rainier	Large yellow fruit with a red blush. Excellent flavor, ranks high in taste tests. Mid season harvest. Pollenizer required, Lapins or English Morello is suggested.	500 hrs	P
<b>FIG</b>	<i>Some figs may be potted. Some sources say there are more than 1,000 varieties of figs!</i>		
Black Jack Semi-Dwarf	Large purplish black fruit with sweet juicy strawberry-red flesh. The tree is naturally smaller growing than most other figs, so it is often labeled 'semi-dwarf'. It can easily be kept to about 8' tall. Fruit ripens in Aug. & Oct. Self-fruitful.	100 hrs.	P S

Highlighted entries are additions this year.

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2012 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Black Mission	This is the favorite fig tree in the area. Medium to large fruit, has a purplish black skin with strawberry colored flesh. The flavor is very good. Fruit is good fresh, dried or canned. Large tree, good along the coast, does very well inland. Self-fruitful	100 hrs.	P S
Brown Turkey	Large bell shaped fruit has a brownish skin with pink flesh. Sweet, rich flavor best used fresh. Does well along the coast or inland. The tree is medium sized to large but can be pruned to just about any shape. Self-fruitful.	100 hrs.	P S
Celestial (Celeste)	Small to medium fruit. Violet to purplish-brown colored skin. Flesh is white, fading to rose at the center. Firm & juicy, sweetest of all. Excellent quality. Best to avoid extremes of heat & cold, likes moderate coastal climates. Two crops a year. Self-fruitful.	100 hrs.	S
Excel	Yellow-green skin, amber flesh. Mild sweet, rich flavor. Produces two crops a year. Good fresh or in jams. Self-fruitful.	100 hrs.	S
Flanders	Skin is brownish-yellow with violet stripes, amber flesh. Strong fine flavor. Excellent all purpose fruit. Good spring crop. Good in southern California, coastal or inland. Self-fruitful.	100 hrs.	S
Janice - Seedless Kadota	Newer white fig, large, sweet & delicious. Light greenish-yellow fruit with practically no seeds. Prolonged harvest Aug.-Nov. Well suited to coastal & inland climates. Can be pruned to almost any shape. Self-fruitful.	100 hrs.	P S
Italian	Everbearing large fruit similar to Brown Turkey, prolific, sweet		P S
King (Desert King)	Larger fruiting fig with light green skin. Excellent quality. Does best in cooler climates, along the coast, not the best for very hot areas, the second crop will often drop. Ripens summer through fall.	100 hrs.	S
Panache 'Tiger Fig'	Especially fine flavor. Small to medium sized fruit with green color skin and yellow 'Tiger' stripes. Strawberry pulp is blood-red in color. Self-fruitful.	100 hrs.	P S
Peters Honey	Beautiful, shiny, greenish yellow fruit when ripe. Very sweet dark, amber flesh. High quality. Superb for fresh eating. Originated in Sicily	100 hrs.	P
Violette de Bordeaux	Smaller fruit is purple-black in color. It has a "strawberry" pulp that has a distinctive sweet rich flavor. Excellent fresh or dried. Smaller tree can be container grown.	100 hrs.	P S
White Genoa	Large fruit has a yellowish-green skin with yellow to light strawberry flesh. This fig has unusually few seeds. Use it fresh or for drying.	100 hrs.	P S

Highlighted entries are additions this year.

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2012 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

White Kadota (Kadota)	Large light greenish-yellow skin with amber flesh. Few seeds in this fig. Good fresh or dried or use for canning. This fig likes hot weather, probably not best near the coast where it's cool, but great inland where it is just a little warmer. Prune to any shape. Self-fruitful.	100 hrs.	P
4-in-1 Fruit Salad	Probably July Elberta Peach, Fantasia Nectarine, Babcock Peach, Santa Rosa Plum, Blenheim Apricot		P S
<b>JUJUBE</b>			
Sugar Cane	Extremely sweet fruit, like candy!		P S
<b>MULBERRY</b>			
Persian Fruiting	Forms a large deciduous tree. Lots of small fruit dark purple to almost black, good for jellies & jams. The tree is fast growing for lots of shade in summer.		P S
Pakistan Fruiting	3" fruit, non staining juice!		P
Tea's Weeping			P
<b>NECTARINE</b>			
Arctic Fantasy	Similar to everyone's favorite, Goldmine, except its larger, tastier and even more colorful. This beautiful red nectarine has extremely sweet, luscious white flesh. Arctic Fantasy ripens in early August.	400 hrs.	P
Arctic Star White	Newer variety of low acid, super sweet white flesh. Rave reviews in trial taste tests. Beautiful dark red skin, snow-white semi-freestone flesh. Low winter chill. Self-fruitful.	300 hrs	P S
Desert Delight	Superior low chill early season nectarine. Large bright red skin with yellow flesh. Rich, tangy flavor, well adapted to mild winter areas. Good along the coast & inland. This tree can be heavily pruned if you want to keep it under 10' tall. Ripens in June. Self-fruitful.	200 hrs.	P
Desert Delight Semi Dwarf		200 hrs.	S
Double Delight	Sensational fruit, consistently the best flavored yellow nectarine. Magnificent double pink blooms. Dark red skin, freestone fruit is sweet with unusually rich flavor. Always scores high in taste tests. The tree is heavy bearing. Ripens in July. Self-fruitful.	200 hrs.	P
Double Delight Semi Dwarf		200 hrs.	S
Necta Zee Miniature High Head	Sweet, firm, flavorful, yellow freestone nectarine with beautiful red skin. Best self-fruitful miniature nectarine. Ripens mid June to early July. Strong, vigorous tree to 6 ft. Self-fruitful.	400 hrs.	S

Highlighted entries are additions this year.

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2012 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Eva's Pride Semi Dwarf	Delicious fine flavored peach with a very low chilling requirement. Medium to large size yellow freestone, recommended as an early season peach for moderate climates. Ripens June & July. Self-fruitful	300 hrs	P S
Feiching Tao	Firm flesh white peach. Heavy bearer.	Less than 500 hrs.	P
Gold Dust	Best early season yellow peach.	500 hrs.	P
John Fanicks	Large, yellow freestone. Red blush. Heavy producer; late July	Less than 500 hrs.	P
Kaweah	Excellent, late season yellow Freestone.	Less than 500 hrs.	P
May Pride Semi Dwarf	Very early, very low chill hours, great flavor.		P
Mid Pride	Best yellow freestone for warm winter climates of So. Calif. This variety also has excellent flavor and dessert quality. Ripens in July. Self-fruitful.	250 hrs.	S
Mid Pride Semi Dwarf		250 hrs.	P S
Pix Zee Miniature	Large fruit ripens mid to late June in Central Calif., two weeks before Honey Babe. Delicious, firm, yellow freestone, beautiful red over orange skin. Vigorous to 6 ft. Self-fruitful.	350 HRS.	S
Red Baron	Beautiful double red blooms. This is the best of both worlds. Excellent showy double red blooms followed by large, juicy, firm, richly flavored freestone fruit. Ripens in July. Self-fruitful.	250-300 hrs	S
Red Baron EZ Pick			P
Red Baron Semi-Dwarf	Same as above, just a smaller growing tree.	250-300 hrs	P
Saturn EZ Pick	Massive bloomer with double pink blooms. Flowering and fruiting peach. Large double pink blooms followed by large yellow freestone fruit which is sweet & juicy. The fruit has a fine flavor. Long time favorite in this area. Ripens in July. Self-fruitful.	250-300 hrs	P
Southern Rose True Dwarf	Large yellow skin overspread with red, firm, crisp, melting yellow flesh. Good eating quality and aroma. Comparable to commercial peaches. Freestone, good for mild winter areas. Only grows to about 5' tall. Ripens in July. Self-fruitful	400 hrs	P S
Tropic Snow	Delicious, white low chill freestone.		S
4-in-1 Low Chill	Multi-graft trees with mild climate peaches. Probably Mid Pride, May Pride, Desert Gold & Eva's Pride		S
4-on-1 Showy Flowers	Multi graft peaches & nectarine, may include Mid Pride peach, Red Barron peach, Saturn peach, Fantastic Nectarine or Double Delight Nectarine.		S

Highlighted entries are additions this year.

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2012 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

4-in-1 Zaiger Pride	Eva's Pride, May Pride, August Pride, Mid Pride and June Pride		P S
<b>PEAR</b>			
Bartlett	Large fruit, smooth, waxy skin. White, sweet flesh. The most popular pear, a vigorous grower. Needs a little more cold, not so good very close to the coast.	500-600 hrs.	P
Fanstil EZ Pick	Large, crisp, juicy fruit. Most resistant to fireblight.	500 hrs.	P
Flordahome	Low chill pear from Florida. Very nice quality; sweet, smooth textured, juicy, flavorful. Harvest July/August Partly Self-fruitful	less than 400 hrs	P S
Hood	Large smooth yellow-green skin pear. Buttery textured flesh containing a few small seeds. It has a sweet, mild flavor. Best if pollinated by other pears if they are in the neighborhood.	150-200 hrs	P S
Keiffer	Medium-large. Late season. Sprightly flavor.	200-300 hrs	S
Twentieth Century	Asian pear, medium round, thin yellow-green skin. Firm, juicy, cream-white flesh, unusual but pleasing flavor. Good for eating fresh or canning. Ripens in Aug. but the fruit can be stored for months. Self-fruitful.	400 hrs	P
4-on-1 Mild Climate Combo	Four mild climate pears grafted on one tree		P S
4-on1 Asian Pear	Four varieties of Asian pears grafted on one tree		P S
<b>PECAN</b>			
Mohawk	Large, soft shell, high quality attractive nut. Bears heavy when young. Good shade tree. Good for mild climate areas. Ripens in Sept. to Oct. Semi self-fertile.	250 hrs.	P
Western Schley	Large, elongated, soft shell nut. Rich flavor. Heavy producer at an early age. This is the west's leading variety and likes arid climates. Excellent for So. Calif. Good pollinator for other varieties. Large tree. Ripens in October. Semi self-fertile.	250 hrs.	P
<b>PERSIMMON</b>			
Chocolate	Sweet, spicy, firm astringent until ripe.		P
Coffee Cake	Unique spicy sweet, non-astringent.		P
Fuyu (Jiro)	Rounded flattened fruit. Reddish-orange skin. Non astringent, bears well as a young tree and is a heavy producer. This one does not have male flowers so it will have fewer seeds unless planted with other Persimmons. Ripens in Nov. Self-fruitful.	200 hrs.	P S
Giant Fuyu	Larger than Fuyu. Not as flat, non astringent.		P

Highlighted entries are additions this year.

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2012 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Hachiya	Very large oblong fruit with rather a short point. Skin is bright orange-red covered with dark blotches. Large & best cooking quality. The tree is vigorous growing and upright with a nice shape. Astringent. Harvest in Nov. Self-fruitful.	200 hrs.	P S
Maru	Medium sized, orange-red fruit, very sweet, glossy skin.		S
Matsumoto Wase Fuyu	Sport of Fuyu. Ripens earlier. Non astringent.	200 hrs.	P
Saijo	Medium, elongated, claimed to be sweetest & best tasting.	200 hrs.	P
<b>HYBRIDS</b>	<i>Crosses of Apricots &amp; Plums &amp; Peach.</i>		
<b>APRIUM &amp; PLUOT &amp; PLUMCOT</b>			
Flavor Delight Aprium	Plum cross, resembles an apricot but has a distinctive flavor and texture all its own. High rating in taste test scores. One of the most flavorful early season fruits. Larger corps are born if pollinated by an apricot. Ripens in June. Self-fertile.	300 hrs	P
Flavor Delight Aprium Semi Dwarf	Same as above only smaller	300 hrs	P S
Cot-N-Candy Aprium Semi Dwarf	Wonderful new fruit from Zaiger Hybrids, early season harvest. White flesh is extra sweet and juicy with a plummy aftertaste. The fruit is about 2" to 2 1/2" in diameter on average. The tree is self fruitful, no pollinizer needed.		P S
Peacotum - Bella Gold "NEW"	blend of Peach, Apricot and Plum. A wonderful new flavor. Fewer than 500 hrs.Pollinate with Flavor Grenade Pluot.		P S
Flavorella Plumcot	Medium sized fruit with translucent golden color; light red blush and slight pubescence. Ripens late May to early June. Excellent flavor with firm, juicy flesh. Recommended pollinizers: Floragold, Royal Rosa or Goldkist apricots.	400 hrs.	P
Dapple Dandy Pluot	Taste test winner. Creamy white & red fleshed freestone with wonderful plum-apricot flavor. Skin is greenish-yellow with red spots, turning to maroon and yellow dapple. Ripens in August. Pollinate with Santa Rosa, Burgundy or Supreme Pluot.	400 hrs	P
Dapple Dandy Semi Dwarf			S
Emerald Drop Pluot	Balanced flavor a little less tart than many others at the skin. This one is green when ripe, the flesh is golden amber. Very sweet, apricot-like flavor with high sugar levels. Best planted with other varieties of pluots for pollination.	400 hrs	P S
Flavor Finale Pluot	Medium-to-large fruit. This one has a purple-red skin. The flesh is amber and very firm. Ripening time is in July. Best planted with other pluots for better pollination.	400 hrs	P S
Flavor Grenade Pluot	Elongated green fruit with a red blush. Crisp texture and explosive flavor. A taste test winner. Can hang on the tree for 4-6 weeks. Pollinate with a Japanese Plum.	400 hrs	P S

Highlighted entries are additions this year.

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2012 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Flavor King Pluot	Unique plum-apricot hybrid with sensational bouquet and sweet, spicy flavor. Reddish-purple skin with cream flesh. The tree is naturally semi-dwarf. Ripens in Aug. Pollinate with Santa Rosa, Late Santa Rosa or Flavor Supreme Pluot.	500 hrs	P
Flavor King Pluot Semi Dwarf		400-500 hrs.	S
Flavor Queen Pluot	Another newer plum-apricot cross. Candy-like sweetness, wonderfully pleasing flavor. Greenish-yellow skin, amber flesh. Ripens in Aug. Pollinate with Dapple Dandy pluot or Santa Rosa plum	500 hrs	P
Flavor Queen Pluot Semi Dwarf		400-500 hrs.	S
Flavorosa Pluot	This was introduced in 2003. Dark purple-red skin. Deep red flesh. Very juicy sweet flesh. Lower chill than most of this one. Ripens in May. Pollinate with a Japanese plum.	300 hrs	P S
Splash	This one has a very different flavor. Think of the best Thompson Seedless grapes you have tasted. It resembles that. The skin is yellow with a red-orange blush. The tree has a nice upright habit. It needs a pollinizer such as other pluots or Japanese plums.	250 hrs	P
Spice Zee Nectaplum Semi Dwarf	The first Nectaplum from Zaiger Hybrids. Spice Zee packs a pile of amazing fruit into an attractive tree for the home gardener. It is slightly acidic and loaded with sugar giving it a spicy, sweet flavor. One can detect both Plum & Nectarine traits with ease. Along with great flavor, Spice Zee is a beautiful ornamental tree with tremendous spring bloom followed by dark red leaves in spring that mature to rich green in summer. Self-fruitful.	300-400 hrs.	P S
4-in-1 Pluot	Flavor King-Flavor Queen-Flavor Supreme-Dapple Dandy		S
4-in-1 Zee Sweet R Nuggets			P S
<b>PLUM</b>			
Beauty Semi Dwarf	A Japanese variety, very low chill requirements. Sweet, flavorful plum more widely adapted than Santa Rosa. Red over yellow skin, amber flesh streaked red. Ripens in June. Self-fruitful.	250 hrs	P S
Burgundy Semi Dwarf	Maroon-colored skin and semi-freestone flesh. Sweet with little or no tartness and very pleasing mild flavor. Rates high in taste test scores. Ripens July & Aug. Self-fruitful.	400 hrs	P S
Golden Nectar Semi Dwarf	Popular yellow dessert plum. Large, oblong fruit with waxy, thin, amber skin. Amber flesh is firm, sweet & flavorful. Very small pit. Self-fruitful.	500 hrs.	P

Highlighted entries are additions this year.

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2012 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Green Gage	Medium sized fruit has a greenish-yellow skin often with a red blush. Very sweet & juicy flesh. Wide climate range and very heavy producing even along the coast. Excellent plum, one of the very best for home orchards. Ripens in June & July. Self-fruitful. Great pollinator too!	300 hrs	P
Green Gage Semi Dwarf	Same as above but a smaller size tree	300 hrs	S
Hollywood	Delicious blood red flesh & skin, low chill, highly ornamental too.		P S
Inca	NEW. Golden skin with magenta specks. Rich flavor, dense, crisp texture. Perfect balance of tart & sweet.		P S
Mariposa (Improved Satsuma) Semi Dwarf	Larger red fleshed, sweet & juicy. The fruit is firm and delicious. Small pit, nearly freestone. Mottled maroon over green skin. Use fresh or cooked. Ripens in Aug. Pollinate with Catalina, Nubiana or Santa Rosa	250 hrs	S
Methley EZ Pick			P
Methley Semi Dwarf	Juicy sweet red flesh, mild flavor. Reddish-purple skin. Attractive tree and very heavy bearing. Ripens in June. Self-fruitful.	250 hrs	S
Santa Rosa Semi Dwarf	The most popular plum in Calif. Juicy, tangy & flavorful. Large, oval purple-red skin with amber flesh, tinged with red. Pleasing tart flavor. Ripens in June. Self-fruitful.	300 hrs	P S
Santa Rosa			P
Weeping Santa Rosa	Large oval fruit with purplish-red skin. Firm yellow flesh. Rich pleasing tart flavor. The tree is semi-dwarf in habit with a graceful, weeping shape. This tree can also make a very attractive espalier. Ripens in July. Self-fruitful.	300 hrs	P S
4-in-1 Low Chill	Mariposa-Beauty-Santa Rosa-Burgundy-Golden Nectar		S
<b>POMEGRANATE</b>	<i>Some pomegranate trees may come in pots</i>		
Ambrosia	Fantastically large fruit, about two-three times as large as Wonderful. Pale pink skin, purple sweet-tart juice similar to Wonderful. Long-lived in any soil, inland or coastal climate. Ripens Aug. Self-fruitful.	150 hrs	P S
Angel Red	Newer Introduction. Larger crop of vivid red fruit. This one has the highest juice content of any pomegranate. The seeds are soft to be eaten or chewed. Some say this is the best Pomegranate.	150 hrs	P S
Austin	Large, pink skin with red blush. Red seeds. Sweet juice- just a hint of tart.		P S
Desertnyi	Light orange exterior. Dark red seeds. Excellent sweet-tart balance. High juice content.		P
Eversweet	Very sweet , virtually seedless fruit. Red skin, clear (non-staining) juice. It does well on the coast & equally well inland. It grows into a tall arching shrub of about 8'-10' tall. You can also train it into a small tree or espalier it as well. Large, showy orange blooms. Harvest late summer through fall. Self-fruitful.	150 hrs	P S

Highlighted entries are additions this year.

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2012 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Garnet Sash	Garnet Sash sports plenty of flowers and fruit even in the first years. Medium-size fruits have yellow skin blushed pinky-red. Large, flavorful seeds press into tartly-sweet juice and are a great antioxidant source. Delicious in juice blends, too.	150-200 hrs.	P
Granada	Large fruit, less tart than Wonderful. Reddeer flowers & seeds than Wonderful.		P
Granada Tree Type			P
Kasmir	Medium size with light pink-red exterior, ruby red seeds with intense flavor.		P
Parfianka	Lots of flavor, soft seeds, wonderful sweet-tart taaste. Yellow exterior blushed red.		S
Pink Satin	Medium to large size, medium pink to dark red fruit with medium to large light-pink seeds. Wonderful refreshing light colored juice is non-staining, with a sweet , fruit punch flavor. Plant is vigorous and can be grown as a shrub or standard tree. Excellent source of anti-oxidants.	150 hrs	P
Red Silk	Medium to large fruit, sweet berry flavor, semi dwarf tree.		S
Sharp Velvet	Dark red seeds and exterior. Very productive.		P
Sirenevyi	Very juicy, very sweet, very tasty. Outstanding variety.		P S
Sweet	Sweeter than Wonderful, more widely adapted to cool summer climates. Small, glossy leafed ornamental tree with showy orange-red blooms in late spring. Very suitable for espalier and container plantings. Fruit can be stored for about 2 months. Ripens in Sept. Self-fertile.	100 hrs.	P S
White	Large fruit, very sweet, juicy white seeds.	100 hrs.	P
Wonderful	Extra large purple-red skin fruit with delicious tangy flavor. Best variety for hot inland climates. Bright red-orange blooms, makes a nice ornamental too. The most well know. Ripens in Sept. Self-fruitful.	150 hrs	P S
Wonderful Tree Type	Same as above only standard form	150 hrs	P
<b>QUINCE</b>			
Pineapple	Pineapple flavored flesh, self fruitful, but better crop with pollinizer.	200 hrs	P
<b>WALNUT</b>			
Pedro	Very small tree less than 2/3 size of other varieties. Well-sealed nut, similar to Payne, has perhaps the finest flavored kernel - winner of consumer taste tests. Widely adapted, excellent choice for home planting. Self fruitful	400hrs	P
Placentia	Medium-sized nut with a smooth, thin, strong shell. Light tan meat fills the shell. Does best in coastal areas and So. Calif. Often used as an ornamental shade tree. Ripens in Oct. Self-fruitful.	300 hrs	P

Highlighted entries are additions this year.

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2012 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

<b>GRAPES</b>	<i>All of our grapes are self fruiting and require bout 100 hours of chill</i>		
Black Monukka Seedless	Large, purplish-black, sweet, crisp fruit. Does not require as much summer heat as Thompson Seedless. Use fresh or dry for raisins. Cane or spur pruning.		P S
Cabernet Sauvignon	Late season red wine grape. Small black strongly flavored berry. Vigorous upright vine. Cane pruning		P S
California Concord	Large, oblong, blue-back seeded grape. Sweet flavor, good along the coast. This is a good grape for juice, eating fresh or jellies. Cane or spur pruning.		P S
Canadice Seedless	Early ripening grape derived from Himrod		P
Concord Seedless	American grape, a sport of Concord. Berries very similar to Concord but seedless (or seeds are very rare). Bluish-black skin, green flesh, distinctive Concord flavor. Cane or spur pruning.		P S
Flame Seedless	Medium size fruit with red skin & firm flesh. A good eating grape. Very productive. Use fresh or for raisins. Likes hot summer heat. Cane or spur pruning		P S
Golden Muscat	American-European hybrid. Large egg-shaped berries are pale golden yellow when ripe. Highly productive, good in coastal areas as well as in warm interior areas. Cane pruning.		P S
Himrod Seedless	Medium sized green seedless grape. Good for table uses, holds well on the vine. This grape is a better choice than Thompson Seedless along the coast. It does not require the heat Thompson needs for best production. Cane pruning		P S
Interlaken	Hybrid of Thompson & American. Needs less heat.		P
Merlot	Blue to black fruit, used for distinctive red wines. Best quality in cooler regions. Medium to large clusters of fruit, ripen in Sept. to Oct. Cane or spur pruning.		S
Perlette Seedless	Large, about 30% larger than Thompson Seedless. Green skin, flesh is firm and very good flavor. Wider climate range than Thompson, does well along the cooler coastal areas. Use as a table grape , or for raisins. Cane pruning		P S
Pinot Noir	Small black berries yielding famous French Burgundy wines. Requires cool summers, early harvest, cane pruning		S
Ruby Seedless (King Ruby)	Medium crisp fruit with dark red skin. Sweet mild flavor. Vigorous growing vine and a heavy producer. Good for table grapes or raisins. Requires less heat than Thompson or Flame. Cane or spur pruning		S
Shirazz/ Syrah			P
Thomcord	Excellent seedless, cross between Thompson Seedless & Concord.		P

Highlighted entries are additions this year.

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2012 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Zinfandel	A good grape for red wines. Medium sized, round, juicy fruit. Reddish-black, early to midseason ripening. Prefers mild winters and cool summers, heavy bearing, Spur pruning		P S

<b>BERRIES</b>			
<b>BLACKBERRIES</b>			
Apache Thornless	Very large fruit on erect, thornless canes. Good quality fruit, good taste		P S
Black Butte	Very large, 1" diameter, 2" long fruit. About two times the size of most other blackberries. Firm fruit, grows on tall, trailing canes. Ripens in June		P S
Black Satin Thornless	Medium to large, very dark, almost black. Honey sweet flavor. Vigorous growing vine. Excellent for home gardeners. Very disease resistant. Newer variety, ripens in July.		P S
Cherokee	Large fruit is firm, attractive and has excellent flavor. Canes are erect, vigorous and moderately thorny. Ripens pretty much the whole month of June.		P S
Chester Thornless	Large firm fleshed fruit with great flavor. Holds up well in hot weather and very blight resistant. Semi-upright canes produce over a long period of time in late season.		S
Kiowa	Extra large fruit, very productive, excellent sweet-tart flavor.		P S
Navaho Thornless	Medium sized fruit on the first fully erect self-supporting thornless. Superior fruit quality, less tart than other thornless cultivars. Ripens mid June to July.		P S
Olallie	Large (1 1/2" long 3/4" thick) shiny black firm berry. Sweeter and less tart than others. Vigorous growing and very productive. Commercially planted in California for market. Ripens June to July		P S
Ouachita	Erect growing, thornless cultivar that has consistent high yields, large fruit size and good postharvest keeping quality.		P S
Prime Jim	Sweet blackberry that produces on first and second year wood!		P
Triple Crown	Large, glossy black, juicy and flavorful. Good for fresh eating, it also makes delicious pies, sauce and jam. Vigorous and easy to harvest.		P S
<b>BOYSENBERRY</b>			
Boysenberry Regular	Large fruit (1 1/2" long 1" thick), non-shiny reddish-black colored berry. Soft, very juicy, sweet-tart tasting berry. Delightful aroma. Dark green foliage. Good for canning, freezing and eating fresh. Great for mild winter areas. Ripens in June.		P S

Highlighted entries are additions this year.

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Boysenberry Thornless	This is almost identical to the one above but few, if any, thorns. Easier to harvest, but it tends to produce some less berries.		P S
<b>LOGANBERRY</b>			
Thornless			S
<b>RASPBERRIES</b>			
Baba Berry	Large, sweet, good for mild winters & hot summers.		P S
Canby	Medium to larger light red berry. The fruit if firm, sweet & excellent for fresh use or freezing. The canes are vigorous. It likes cooler summers and is nearly thornless. Ripens in June		P S
Fall Gold	This berry has excellent flavor. It has a golden yellow fruit that ripens starting in June but the heavier crops come in Aug. & Sept. Use them fresh, frozen or for preserves.		P S
Heritage Red	Dark red, mild flavor, upright grower.		P S
Indian Summer	Medium to large dark red berry. Soft & tasty, ever-bearing. Well adapted to heavy soils that are in our area. Good for canning, freezing, preserves & jams.		S
September	Good, tart flavor. Vigorous, hardy, mosaic resistant plant. Good choice for colder climates.		P S
<b>YOUNGBERRIES</b>			
Thornless	One of the best berries for growing at home. Dark purple, almost black. Very similar to Boysenberry but softer so you seldom see them in the market. They don't ship well. They are very flavorful and great fresh off the vine. Wonderful for jams & jellies. They freeze well too. Long growing canes, to about 12' long, produce lots of fruit on last year's growth.		P S
<b>BLUEBERRIES</b>	<i>Note: Most Blueberries will produce repeat crops nearly all year long here, in our mild climate. Removing the fruit the first year is recommended to promote better vigor and larger plants. They like a rich 'acid' soil like Camellias. You can use a 'Camellia Mix' when you plant, or lots of peat moss. Plants may not go completely dormant in our winters.</i>		
Jewel	Moderately low chilling requirement, very early ripening, and high berry quality.		P S
Jubilee Southern High Bush	Outstanding flavor for this early season blueberry. Fruit is medium to large, light blue. Consistently productive bush, even in less than optimum blueberry sites. From USDA breeding program. Upright bush 5' to 6' tall, early season ripening.	400 hrs	P S

Highlighted entries are additions this year.

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.
