## Cotinus coggygria Smoketree

**Smoketree comes from southern Europe, central China, and the Himalayas. The foliage of the smoketree is interesting in all seasons. From a distance the leaves might look almost black in contrast with surrounding trees of green. Produces cloud of airy smoky pink flowers on current season growth. Use as a shrub border, specimen, in small groupings, or for hard-to-grow-in sites.**

- ◆ **Grows 10'-15' tall**
- ◆ **Drought tolerant**
- ◆ **Water regularly, don't over water**
- ◆ **Takes sun**
- ◆ **Good for a range of soil types**
