2009 Fruit Tree List

Item	Description	Chill Hrs	Loc.
ALMONDS			
All In One	The #1 almond for home & orchard, this tree produces heavy crops. Its large crops tend to stunt the tree, making it a semi-dwarf. Medium to large soft shelled fruit, sweet kernels. Ripens Sept. to Oct. Self fruitful Semi-dwarf	500 hrs	P S
Garden Prince	Compact growing, lushly foliated tree to about 10-12 feet tall. Soft kernels, especially sweet and tasty. Bears young and heavy. Large, light pink blooms in spring. Ripens Sept. to Oct. Self-fruitful Semi-dwarf.	250 hrs	P
APPLES			
Anna	Remarkable apple for mild winter areas. Great in So. California. It bears large crops of sweet, crisp fruit. Good fresh or cooked. Ripens in June. Self-fruitful.	200 hrs.	P S
Anna Semi-Dwarf	Same as above, just smaller growing		P
Anna Espaliered	Same as Anna, but has several pre-formed horizontal branches		P S
Beverly Hills	Medium size fruit with yellow skin and red stripes. Crisp and juicy bears well in mild climate areas. Ripens late June Self-fruitful.	200 hrs.	S
Braeburn	Newer variety from New Zealand. Superb late season fruit, very crisp & tangy, more flavorful than Granny Smith. Excellent keeping apple. Green fruit with dark red blush. Ripens Oct. to Nov. Self-fruitful.	250 hrs	S
Dorset Golden	Outstanding sweet apple for warm winter areas. Firm, very flavorful, sweet like Golden Delicious. Yellow skin with an orange blush. Very low chill requirements. Ripens in June. Self-fruitful	100 hrs.	P S
Dorset Golden Dwarf	Same as above, just smaller growing 6-8ft		P
Dorset Golden Espaliered	Same as above, but has several pre-formed horizontal branches		P S
Fuji	One of the very best apples grown world wide. Firm, crunchy, juicy, white flesh. This apple has excellent flavor. It is also a very good keeping apple. This apple has become a favorite across the country its popularity grows every year. Ripens Sept. Self-fruitful.	300 hrs	P S
Fuji Semi-Dwarf	Same as above, just smaller growing.		P S
Fuji Espaliered	Same as Fuji, but has several pre-formed horizontal branches		PS
Gala	Wonderful dessert apple from New Zealand. The fruit is crisp with a nice blend of sweetness and tartness. Wonderful rich flavor. The skin is reddish-orange over yellow. Adapts well to warm climates. Ripens in Aug. & Sept.		P
Gala Semi-Dwarf	Same as above only smaller	500-600 hrs	P
Gala Espaliered	Same as above but has several pre-formed horizontal branches		P
Granny Smith Semi-Dwarf	A newer variety from New Zealand. Large late, green all-purpose apple. Eating, cooking & sauce. Crisp, tart, excellent keeper. Prefers long summers, thrives in hot climates. The tree has prolonged blooms and is a good pollenizer of other apples. Ripens in Aug. & Sept. Self-fruitful.	500 hrs	P
Mutsu (Crispin)	A favorite of connoisseurs, very large, crisp and flavorful. Skin is green with an orange blush. Flesh is white, coarse, firm, crisp, juicy and slightly acidic. Excellent flavor. Pick when green or wait till partly yellow. Pollen sterile - Pollinate with Red Delicious, Granny Smith, Fuji, or Gala. Ripens Late October.	500 hrs	S
Pink Lady (Crisps Pink)	Newer hot climate apple from Australia. Very crisp, sweet-tart distinct flavor. Good keeping apple. Skin is reddish-brown over green, with white stripe. White flesh resists browning. Ripens in Sept. Self-fruitful.	400 hrs	S P
White Winter Pearmain	High quality all purpose apple. An OLD FAVORITE especially for fresh use. Widely adapted including Southern California's mild winter areas. Medium to large fruit is pale yellow with dull red blush. Bears heavy and is an excellent keeping apple. Ripens Sept-Oct Self-fruitful	400 hrs	S

2009 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Yellow Newtown Pippen	Fruit is yellow green in color. Superb flavor is slightly tart. For peak flavor wait to harvest till cheeks are blushed. Ripens Late Oct - Nov. Vigorous tree self- fruitful	400hrs	S
4-on-1 Mild Climate Combo	Probably Fuji-Gala-Mutsu-Jonna Gold		S
4-on-1 Low Chill Combo	Probably Anna-Fuji-Dorset Golden-Gala		PS
4-on-1 Fruit Salad			P
3-on-1 Low Chill	Probably Anna-Dorset Golden-Fuji		PS
APRICOT			
Autumn Glo	A newer late season apricot with a sweet, slightly acid flavor. The fruit is good both fresh and dried. It is juicy and very aromatic. It will please the most critical of apricot lovers. Harvest is later, August. Self-fruitful.		S
Blenheim (Royal)	All purpose freestone, sweet, aromatic and very flavorful. Long time #1 apricot in Calif. It blooms early, good for canning and drying. This is a semi-dwarf tree to about 14' tall. Ripens in June & July. Self-fruitful.	400 hrs	S
Early Autumn	Great flavor as tested by Dave Wilson Nursery. Use both fresh or dried. Those who taste it rate it near the top most of the time. Ripens in August. Self-fruitful.	500 hrs	S
Gold Kist	Excellent back yard apricot for warm winter climates. Freestone and very good quality. Heavy bearing tree. Ripens in June. Self-fruitful.	300 hrs	PS
Gold Kist Semi Dwarf	Same as above only smaller	300 hrs	P
Katy	Large, all purpose flavorful apricot. Tree ripe fruit is not tart. A favorite for warm winter climates. One of the best apricots for our area. Ripens in June. Self-fruitful.	300 hrs	P
Katy Semi Dwarf	Same as above only smaller	300 hrs	P
Tropic Gold	NEWER INTRODUCTION of a great new Apricot. This one should do well in the warmer Southern California areas. The tree produces heavy crops which make the tree almost weeping.	400 hrs	P S
Royal Rosa	Extremely vigorous, more disease resistant than other apricots. Bearing young & heavy especially nice fruit. Sweet, low acid and fine flavor. Very early harvest. Ripens in May & June. Self-fruitful.	500 hrs	S
4-on-1 Apricot			S
CHERRY			
Craig's Crimson	<i>NOTE: Most Cherries need colder climates, coldest inland and canyons or mountains. Minnie Royal and Royal Lee are very low chill.</i> Taste test winner. Natural semi-dwarf tree, about 2/3 the size of standard Cherry trees. Perhaps the finest sweet cherry. Dark red to nearly black medium to large fruit. Wonderful 'spicy' flavor. Very firm texture	800 hrs	P
English Morello	Medium sized fruit, red & tart. Excellent for pies. A good pollenizer for other cherries. Ripens in late July	400 hrs	P
Lapins	Newer variety from Canada. Dark red, sweet cherry is large & firm. Self-fruitful.	600 hrs	PS
Lapins Semi Dwarf	Same as above only smaller	600 hrs	P
Minnie Royal Cherry	Yellow fruit with a pink blush	300 hrs	PS
Royal Lee	Large yellow cherry with more red blush than Rainier. Excellent flavor. Pollenizer required, grower suggests Minnie Royal or English Morello as possible pollenizers. Moderate chill hours.	300 hrs	PS
Royal Rainier	Large yellow fruit with a red blush. Excellent flavor, ranks high in taste tests. Mid season harvest. Pollenizer required, Lapins or English Morello is suggested.	500 hrs	PS
Stella	Very compact tree with large fruit, very dark red, nearly black. Firm, sweet dark fresh with good flavor and texture. Resistant to cracking. This tree bears at a young age and is a good pollenizer for all sweet cherries. Self-fruitful.	700 hrs	P
CRABAPPLE			
Transcedent	Yellow skin with pink or reddish blush to almost entirely red. Up to 2 inches wide. Creamy yellow flesh is crisp, juicy, and flavorful. Late summer harvest. Self-fruitful medium size tree.	7-800hrs	P
FIG			
	<i>Some figs may be potted. Some sources say there are more than 1,000 varieties of figs!</i>		

2009 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Black Jack Semi-Dwarf	Large purplish black fruit with sweet juicy strawberry-red flesh. The tree is naturally smaller growing than most other figs, so it is often labeled 'semi-dwarf'. It can easily be kept to about 8' tall. Fruit ripens in Aug. & Oct. Self-fruitful.	100 hrs.	PS
Black Mission	This is the favorite fig tree in the area. Medium to large fruit, has a purplish black skin with strawberry colored flesh. The flavor is very good. Fruit is good fresh, dried or canned. Large tree, good along the coast, does very well inland. Self-fruitful	100 hrs.	PS
Brown Turkey	Large bell shaped fruit has a brownish skin with pink flesh. Sweet, rich flavor best used fresh. Does well along the coast or inland. The tree is medium sized to large but can be pruned to just about any shape. Self-fruitful.	100 hrs.	PS
Celestial (Celeste)	Small to medium fruit. Violet to purplish-brown colored skin. Flesh is white, fading to rose at the center. Firm & juicy, sweetest of all. Excellent quality. Best to avoid extremes of heat & cold, likes moderate coastal climates. Two crops a year. Self-fruitful.	100 hrs.	S
Excel	Yellow-green skin, amber flesh. Mild sweet, rich flavor. Produces two crops a year. Good fresh or in jams. Self-fruitful.	100 hrs.	S
Flanders	Skin is brownish-yellow with violet stripes, amber flesh. Strong fine flavor. Excellent all purpose fruit. Good spring crop. Good in southern California, coastal or inland. Self-fruitful.	100 hrs.	S
Janice - Seedless Kadota	Newer white fig, large, sweet & delicious. Light greenish-yellow fruit with practically no seeds. Prolonged harvest Aug.-Nov. Well suited to coastal & inland climates. Can be pruned to almost any shape. Self-fruitful.	100 hrs.	P
King (Desert King)	Larger fruiting fig with light green skin. Excellent quality. Does best in cooler climates, along the coast, not the best for very hot areas, the second crop will often drop. Ripens summer through fall.	100 hrs.	S
Panache 'Tiger Fig'	Especially fine flavor. Small to medium sized fruit with green color skin and yellow 'Tiger' stripes. Strawberry pulp is blood-red in color. Self-fruitful.	100 hrs.	PS
Peters Honey		100 hrs.	P
Violette de Bordeaux	Smaller fruit is purple-black in color. It has a "strawberry" pulp that has a distinctive sweet rich flavor. Excellent fresh or dried. Smaller tree can be container grown.	100 hrs.	S
White Genoa	Large fruit has a yellowish-green skin with yellow to light strawberry flesh. This fig has unusually few seeds. Use it fresh or for drying.	100 hrs.	PS
White Kadota (Kadota)	Large light greenish-yellow skin with amber flesh. Few seeds in this fig. Good fresh or dried or use for canning. This fig likes hot weather, probably not best near the coast where it's cool, but great inland where it is just a little warmer. Prune to any shape. Self-fruitful.	100 hrs.	S
MULBERRY PERSIAN FRUITING	<i>Forms a large deciduous tree. Lots of small fruit dark purple to almost black, good for jellies & jams. The tree is fast growing for lots of shade in summer.</i>		P S
NECTARINE			
Arctic Star White	Newer variety of low acid, super sweet white flesh. Rave reviews in trial taste tests. Beautiful dark red skin, snow-white semi-freestone flesh. Low winter chill. Self-fruitful.	300 hrs	PS
Desert Delight	Superior low chill early season nectarine. Large bright red skin with yellow flesh. Rich, tangy flavor, well adapted to mild winter areas. Good along the coast & inland. This tree can be heavily pruned if you want to keep it under 10' tall. Ripens in June. Self-fruitful.	200 hrs.	PS
Double Delight	Sensational fruit, consistently the best flavored yellow nectarine. Magnificent double pink blooms. Dark red skin, freestone fruit is sweet with unusually rich flavor. Always scores high in taste tests. The tree is heavy bearing. Ripens in July. Self-fruitful.	200 hrs.	PS
Sauzee King White Saucer	From Zaiger hybrids, the first donut style nectarine. Outstanding early season variety has white flesh that is sweet & juicy. The tree sets at a young age and produces heavily. Thinning is required for large size fruit. Red skin over a blush of yellow.	500 hrs.	S

2009 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Panamint	Attractive fruit has red skin with yellow freestone flesh. Heavy producing variety in mild winter areas. Intensely flavored, nice acid-sugar balance. Dependable longtime favorite. Ripens in July. Self-fruitful.	250 hrs	S
Panamint Semi-Dwarf	Same as above, just a smaller growing tree.	250 hrs	P
Snow Queen Semi Dwarf	This nectarine has wonderful flavor and rates high in taste tests. Sweet & juicy, early season & freestone. A favorite in S. Calif. Because of the low chilling requirements. Ripens in June & July. Self-fruitful.	250 -300 hrs	P
Southern Belle True Dwarf 18" Standard	This is a true dwarf variety and may get to 5' tall. Very large yellow skin fruit with a red blush. Very productive, freestone. Blooms early with low chill requirements. Ripens early Aug. Self-fruitful.	300 hrs	S
PEACH			
August Pride	Large all-purpose yellow freestone for mild winter climates. Sweet aromatic, rich flavor, one of the very best. Ripens in late July to Aug. Self-fruitful.	300 hrs	PS
Babcock	Longtime favorite white-fleshed freestone peach. The skin has a red cheek. The fruit is medium size, on a heavily producing tree. Ripens in July. Self-fruitful	250-300 hrs	S
Babcock Semi Dwarf	Same as above, just a smaller growing tree.	250-300 hrs	P
Bonanza True Dwarf Peach	This is a true dwarf peach tree that will get to about 4-5' tall. Small & compact growing, shrub-like. Lots of leaves drooping from the short, stubby stems. Light pink blooms followed by medium sized fruit. Yellow skin with a red blush. Yellow freestone flesh with good flavor. Ripens in June. Self-fruitful	300 hrs	S
Bonita	Medium to large fruit has red blushed skin. Yellow flesh is a freestone peach. Fine flavor. Bears well in mild climate areas & coastal climates. Ripens in late July.	300 hrs	S
Donut (Start Saturn) (Saucer Peach)	Sometimes called "Peento Peach", unique white fleshed fruit with a shrunken center, somewhat shaped like a doughnut. Sweet, mild flavor described as some as almost almond-like. Ripens in July. Self-	300-400 hrs	S
Donut (Start Saturn) (Saucer Peach) Semi Dwarf	Same as above only smaller	300-400 hrs	P
Eva's Pride	Delicious fine flavored peach with a very low chilling requirement. Medium to large size yellow freestone, recommended as an early season peach for moderate climates. Ripens June & July. Self-fruitful	300 hrs	S
Eva's Pride Semi Dwarf	Same as above only smaller		P
Mid Pride	Best yellow freestone for warm winter climates of So. Calif. This variety also has excellent flavor and dessert quality. Ripens in July. Self-fruitful.	250 hrs.	PS
Red Barron	Beautiful double red blooms. This is the best of both worlds. Excellent showy double red blooms followed by large, juicy, firm, richly flavored freestone fruit. Ripens in July. Self-fruitful.	250-300 hrs	SP
Red Barron Semi-Dwarf	Same as above, just a smaller growing tree.	250-300 hrs	P
Saturn	Massive bloomer with double pink blooms. Flowering and fruiting peach. Large double pink blooms followed by large yellow freestone fruit which is sweet & juicy. The fruit has a fine flavor. Long time favorite in this area. Ripens in July. Self-fruitful.	250-300 hrs	PS
Santa Barbara	Larger fruit is blushed red. Yellow freestone, red near the pit. Does well in mild coastal areas. Ripens July Self-fruitful	300 hrs	S
Sweet Bagel	Flat, donut shaped peach with yellow flesh, classic peach flavor. It has large fruit and sets heavily.	500-700 hrs	S
Southern Rose True Dwarf	Large yellow skin overspread with red, firm, crisp, melting yellow flesh. Good eating quality and aroma. Comparable to commercial peaches. Freestone, good for mild winter areas. Only grows to about 5' tall. Ripens in July. Self-fruitful	400 hrs	S
4-on-1 Low Chill	Multi-graft trees with mild climate peaches. Probably Mid Pride, May Pride, Desert Gold & Eva's Pride		P S
4-on-1 Showy Flowers	Multi graft peaches & nectarine, may include Mid Pride peach, Red Barron peach, Saturn peach, Fantastic Nectarine or Double Delight Nectarine.		S

2009 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

4-on-1 White Peach/Nectarine Four different varieties on one tree. Usually two nectarines and two peaches.	Four different varieties on one tree. Usually two nectarines and two peaches.		S
4 on 1 Ziger Pride	Eva's Pride, May Pride, August Pride, and June Pride		S
PEAR			
Bartlett	Large fruit, smooth, waxy skin. White, sweet flesh. The most popular pear, a vigorous grower. Needs a little more cold, not so good very close to the coast.	800 hrs.	P
Flordahome	Low chill pear from Florida. Very nice quality; sweet, smooth textured, juicy, flavorful. Harvest July/August Partly Self-fruitful	less than 400 hrs	P
Hood	Large smooth yellow-green skin pear. Buttery textured flesh containing a few small seeds. It has a sweet, mild flavor. Best if pollinated by other pears if they are in the neighborhood.	150-200 hrs	P
Twentieth Century	Asian pear, medium round, thin yellow-green skin. Firm, juicy, cream- white flesh, unusual but pleasing flavor. Good for eating fresh or canning. Ripens in Aug. but the fruit can be stored for months. Self- fruitful.	400 hrs	P
4-on-1 Mild Climate Combo	Four mild climate pears grafted on one tree		S
4-on1 Asian Pear	Four varieties of Asian pears grafted on one tree		S
PECAN			
Mohawk	Large, soft shell, high quality attractive nut. Bears heavy when young. Good shade tree. Good for mild climate areas. Ripens in Sept. to Oct. Semi self-fertile.		P
Western Schley	Large, elongated, soft shell nut. Rich flavor. Heavy producer at an early age. This is the west's leading variety and likes arid climates. Excellent for So. Calif. Good pollinator for other varieties. Large tree. Ripens in October. Semi self-fertile.		P
PERSIMMON			
Fuyu (Jiro)	Rounded flattened fruit. Reddish-orange skin. Non astringent, bears well as a young tree and is a heavy producer. This one does not have male flowers so it will have fewer seeds unless planted with other Persimmons. Ripens in Nov. Self-fruitful.	200 hrs.	PS
Hachiya	Very large oblong fruit with rather a short point. Skin is bright orange- red covered with dark blotches. Large & best cooking quality. The tree is vigorous growing and upright with a nice shape. Astringent. Harvest in Nov. Self-fruitful.	200 hrs.	P S
Izu	Very sweet & tasty, non astringent fruit. Medium to large size round shaped fruit. This is a smaller tree, a good choice for a back yard persimmon. Ripens in Oct. & Nov. Self-fruitful.		100 P
HYBRIDS			
APRIUM & PLUOT & PLUMCOT			
Flavor Delight Aprium	Plum cross, resembles an apricot but has a distinctive flavor and texture all its own. High rating in taste test scores. One of the most flavorful early season fruits. Larger corps are born if pollinated by an apricot. Ripens in June. Self-fertile.	300 hrs	P S
Flavor Delight Aprium Semi Dwarf	Same as above only smaller	300 hrs	P
Cot-N-Candy Aprium	Wonderful new fruit from Zaiger Hybrids, early season harvest. White flesh is extra sweet and juicy with a plummy aftertaste. The fruit is about 2" to 2 1/2" in diameter on average. The tree is self fruitful, no pollenizer needed.		S
Cot-N-Candy Aprium Semi Dwarf	Same as above only smaller		P
Dapple Dandy Pluot	Taste test winner. Creamy white & red fleshed freestone with wonderful plum-apricot flavor. Skin is greenish-yellow with red spots, turning to maroon and yellow dapple. Ripens in August. Pollinate with Santa Rosa, Burgundy or Supreme Pluot.	400 hrs	S
Emerald Drop Pluot	Balanced flavor a little less tart than many others at the skin. This one is green when ripe, the flesh is golden amber. Very sweet, apricot- like flavor with high sugar levels. Best planted with other varieties of pluots for pollination.	400 hrs	S

2009 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Flavor Finale Pluot	Medium-to-large fruit. This one has a purple-red skin. The flesh is amber and very firm. Ripening time is in July. Best planted with other pluots for better pollination.	400 hrs	S
Flavor Grenade Pluot	Elongated green fruit with a red blush. Crisp texture and explosive flavor. A taste test winner. Can hang on the tree for 4-6 weeks. Pollinate with a Japanese Plum.	400 hrs	S
Flavor King Pluot	Unique plum-apricot hybrid with sensational bouquet and sweet, spicy flavor. Reddish-purple skin with cream flesh. The tree is naturally semi-dwarf. Ripens in Aug. Pollinate with Santa Rosa, Late Santa Rosa or Flavor Supreme Pluot.	500 hrs	S
Flavor Queen Pluot	Another newer plum-apricot cross. Candy-like sweetness, wonderfully pleasing flavor. Greenish-yellow skin, amber flesh. Ripens in Aug. Pollinate with Dapple Dandy pluot or Santa Rosa plum	500 hrs	S
Flavorosa Pluot	This was introduced in 2003. Dark purple-red skin. Deep red flesh. Very juicy sweet flesh. Lower chill than most of this one. Ripens in May. Pollinate with a Japanese plum.	300 hrs	P S
Splash	This one has a very different flavor. Think of the best Thompson Seedless grapes you have tasted. It resembles that. The skin is yellow with a red-orange blush. The tree has a nice upright habit. It needs a pollinizer such as other pluots or Japanese plums.	250 hrs	S
Spice Zee Nectaplum	The first Nectaplum from Zaiger Hybrids. Spice Zee packs a pile of amazing fruit into an attractive tree for the home gardener. It is slightly acidic and loaded with sugar giving it a spicy, sweet flavor. One can detect both Plum & Nectarine traits with ease. Along with great flavor, Spice Zee is a beautiful ornamental tree with tremendous spring bloom followed by dark red leaves in spring that mature to rich green in summer. Self-fruitful.		S
Spice Zee Nectaplum Semi Dwarf 4-in-1 Pluot	Same as above only smaller 4 different varieties on one tree		P P S
PLUM			
Beauty	A Japanese variety, very low chill requirements. Sweet, flavorful plum more widely adapted than Santa Rosa. Red over yellow skin, amber flesh streaked red. Ripens in June. Self-fruitful.	250 hrs	S
Beauty Semi Dwarf Burgundy	Same as above only smaller Maroon-colored skin and semi-freestone flesh. Sweet with little or no tartness and very pleasing mild flavor. Rates high in taste test scores. Ripens July & Aug. Self-fruitful.	200 hrs. 400 hrs	P S
Burgundy Semi Dwarf	Same as above only smaller	400hrs	P
Green Gage Jefferson Strain	Medium sized fruit has a greenish-yellow skin often with a red blush. Very sweet & juicy flesh. Wide climate range and very heavy producing even along the coast. Excellent plum, one of the very best for home orchards. Ripens in June & July. Self-fruitful.	300 hrs	P
Green Gage Dwarf	Same as above but a smaller size tree		S
Mariposa (Improved Satsuma)	Larger red fleshed, sweet & juicy. The fruit is firm and delicious. Small pit, nearly freestone. Mottled maroon over green skin. Use fresh or cooked. Ripens in Aug. Pollinate with Catalina, Nubiana or Santa Rosa	250 hrs	S
Methley	Juicy sweet red flesh, mild flavor. Reddish-purple skin. Attractive tree and very heavy bearing. Ripens in June. Self-fruitful.	250 hrs	S
Santa Rosa	The most popular plum in Calif. Juicy, tangy & flavorful. Large, oval purple-red skin with amber flesh, tinged with red. Pleasing tart flavor. Ripens in June. Self-fruitful.	300 hrs	S
Santa Rosa Semi Dwarf Weeping Santa Rosa	Same as above only smaller Large oval fruit with purplish-red skin. Firm yellow flesh. Rich pleasing tart flavor. The tree is semi-dwarf in habit with a graceful, weeping shape. This tree can also make a very attractive espalier. Ripens in July. Self-fruitful.	300 hrs 300 hrs	P S
4-on1 Plum	Four different Plums grafted on one tree, self-fruitful <i>Some pomegranate trees may come in pots</i>	300 hrs	S
POMEGRANATE			
Ambrosia	Fantastically large fruit, about two-three times as large as Wonderful. Pale pink skin, purple sweet-tart juice similar to Wonderful. Long-lived in any soil, inland or coastal climate. Ripens Aug. Self-fruitful.	150 hrs	PS

2009 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Angel Red	Newer Introduction. Larger crop of vivid red fruit. This one has the highest juice content of any pomegranate. The seeds are soft to be eaten or chewed. Some say this is the best Pomegranate.	150 hrs	S
Eversweet	Very sweet , virtually seedless fruit. Red skin, clear (non-staining) juice. It does well on the coast & equally well inland. It grows into a tall arching shrub of about 8'-10' tall. You can also train it into a small tree or espalier it as well. Large, showy orange blooms. Harvest late summer through fall. Self-fruitful.	150 hrs	PS
Kashmir (Potted)	The fruit has a sour-tart flavor with good acid-sugar balance. It was originally marketed under the name 'Sour'. Self-fruitful.	150 hrs	S
Pink Satin	Medium to large size, medium pink to dark red fruit with medium to large light-pink seeds. Wonderful refreshing light colored juice is non-staining, with a sweet , fruit punch flavor. Plant is vigorous and can be grown as a shrub or standard tree. Excellent source of anti-oxidants.	150hrs	P
Red Silk	A U.C. Davis introduction. Large fruit on a heavily bearing tree. The red juice is tart with rich 'grenadine' flavor. It has good acid, sweetness balance. Self-fruitful.	150 hrs	S
Sharp Velvet	Large fruit with deep red skin and dark seeds. Unique, mildly acidic flavor. Upright growing plant sets huge crops of fruit. Eat fresh or use in cooking. Self-fruitful.	150 hrs	S
Sweet (Potted)	Sweeter than Wonderful, more widely adapted to cool summer climates. Small, glossy leafed ornamental tree with showy orange-red blooms in late spring. Very suitable for espalier and container plantings. Fruit can be stored for about 2 months. Ripens in Sept. Self-fertile.	100 hrs.	PS
Wonderful	Extra large purple-red skin fruit with delicious tangy flavor. Best variety for hot inland climates. Bright red-orange blooms, makes a nice ornamental too. The most well know. Ripens in Sept. Self-fruitful.	150 hrs	PS
Wonderful Tree Type	Same as above only standard form	150 hrs	P
WALNUT			
Placentia	Medium-sized nut with a smooth, thin, strong shell. Light tan meat fills the shell. Does best in coastal areas and So. Calif. Often used as an ornamental shade tree. Ripens in Oct. Self-fruitful.	300 hrs	P
Pedro - If Available	Very small tree less than 2/3 size of other varieties. Well-sealed nut, similar to Payne, has perhaps the finest flavored kernel - winner of consumer taste tests. Widely adapted, excellent choice for home planting. Self fruitful	400hrs	P
BERRIES			
BLACKBERRIES			
Apache Thornless	Very large fruit on erect, thornless canes. Good quality fruit, good taste		S
Black Butte	Very large, 1" diameter, 2" long fruit. About two times the size of most other blackberries. Firm fruit, grows on tall, trailing canes. Ripens in June		S
Black Satin Thornless	Medium to large, very dark, almost black. Honey sweet flavor. Vigorous growing vine. Excellent for home gardeners. Very disease resistant. Newer variety, ripens in July.		PS
Cherokee	Large fruit is firm, attractive and has excellent flavor. Canes are erect, vigorous and moderately thorny. Ripens pretty much the whole month of June.		S
Chester Thornless	Large firm fleshed fruit with great flavor. Holds up well in hot weather and very blight resistant. Semi-upright canes produce over a long period of time in late season.		S
Navaho Thornless	Medium sized fruit on the first fully erect self-supporting thornless. Superior fruit quality, less tart than other thornless cultivars. Ripens mid June to July.		PS
Olallie	Large (1 1/2" long 3/4" thick) shiny black firm berry. Sweeter and less tart than others. Vigorous growing and very productive. Commercially planted in California for market. Ripens June to July		PS

BOYSENBERRY

2009 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Boysenberry Regular	Large fruit (1 1/2" long 1" thick), non-shiny reddish-black colored berry. Soft, very juicy, sweet-tart tasting berry. Delightful aroma. Dark green foliage. Good for canning, freezing and eating fresh. Great for mild winter areas. Ripens in June.		PS
Boysenberry Thornless	This is almost identical to the one above but few, if any, thorns. Easier to harvest, but it tends to produce some less berries.		PS
BLUEBERRIES			
Jubilee Southern High Bush	Outstanding flavor for this early season blueberry. Fruit is medium to large, light blue. Consistently productive bush, even in less than optimum blueberry sites. From USDA breeding program. Upright bush 5' to 6' tall, early season ripening.	400 hrs	P S
Misty or Chandler Southern High Bush	Early ripening, quite vigorous growing, does very well along the coast and with inland heat. The fruit has excellent flavor and has a very low chill requirement.	150 hrs	PS
O'Neal Southern High Bush	Attractive large firm, very sweet fruit. Outstanding newer variety from N. Carolina State Univ. and USDA breeding program. Good heat tolerance. Yields comparable with the best Northern High Bush varieties. Self-fruitful but produces better when planted with other varieties. Upright growth to 5'-6' tall.	200 hrs.	PS
Ozark Blue	Outstanding flavor, late season, performs well in cold country or in areas with summer heat.	400 hrs	S
Sharp's Blue (Sharpblue) Southern High Bush	Number one Southern High Bush planted in Florida. Fruit is medium size, medium blue in color. Average firmness with good flavor. It grows to about 4' to 5' tall. This variety has nice red foliage in fall.	150-200 hrs	PS
South Moon	Large, firm excellent berries that have superb flavor. The plant is upright & vigorous. It prefers light sandy, good draining soil and does well in So. Calif, inland & coastal. Ripens early season.	300 hrs	PS
Sunshine Southern High Bush	This one performs for gardeners from San Diego to Seattle. Evergreen compact plant to about 3' tall. Heavy crops & low chilling requirements, yet frost hardy. Tolerates a higher pH than most other blueberries. Self-fruitful.	150 hrs	PS
RASPBERRIES			
Bababerry	Extra large berry, red, sweet & firm. Excellent flavor, good for hot, dry valley areas and mild winter areas (developed in S. Calif.). Bears larger crops in early summer & a small crop in late fall.		PS
Canby	Medium to larger light red berry. The fruit if firm, sweet & excellent for fresh use or freezing. The canes are vigorous. It likes cooler summers and is nearly thornless. Ripens in June		S
Fall Gold	This berry has excellent flavor. It has a golden yellow fruit that ripens starting in June but the heavier crops come in Aug. & Sept. Use them fresh, frozen or for preserves.		P
Indian Summer	Medium to large dark red berry. Soft & tasty, ever-bearing. Well adapted to heavy soils that are in our area. Good for canning, freezing, preserves & jams.		S
September	Good, tart flavor. Vigorous, hardy, mosaic resistant plant. Good choice for colder climates.		S
YOUNGBERRIES			
Thornless	One of the best berries for growing at home. Dark purple, almost black. Very similar to Boysenberry but softer so you seldom see them in the market. They don't ship well. They are very flavorful and great fresh off the vine. Wonderful for jams & jellies. They freeze well too. Long growing canes, to about 12' long, produce lots of fruit on last year's growth.		PS
GRAPES			
	<i>All of our grapes are self fruiting and require bout 100 hours of chill</i>		

2009 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Black Monukka Seedless	Large, purplish-black, sweet, crisp fruit. Does not require as much summer heat as Thompson Seedless. Use fresh or dry for raisins. Cane or spur pruning.	PS
Cabernet Sauvignon	Late season red wine grape. Small black strongly flavored berry. Vigorous upright vine. Cane pruning	PS
California Concord	Large, oblong, blue-back seeded grape. Sweet flavor, good along the coast. This is a good grape for juice, eating fresh or jellies. Cane or spur pruning.	PS
Concord Seedless	American grape, a sport of Concord. Berries very similar to Concord but seedless (or seeds are very rare). Bluish-black skin, green flesh, distinctive Concord flavor. Cane or spur pruning.	PS
Flame Seedless	Medium size fruit with red skin & firm flesh. A good eating grape. Very productive. Use fresh or for raisins. Likes hot summer heat. Cane or spur pruning	PS
Golden Muscat	American-European hybrid. Large egg-shaped berries are pale golden yellow when ripe. Highly productive, good in coastal areas as well as in warm interior areas. Cane pruning.	S
Himrod Seedless	Medium sized green seedless grape. Good for table uses, holds well on the vine. This grape is a better choice than Thompson Seedless along the coast. It does not require the heat Thompson needs for best production. Cane pruning	S
Merlot	Blue to black fruit, used for distinctive red wines. Best quality in cooler regions. Medium to large clusters of fruit, ripen in Sept. to Oct. Cane or spur pruning.	S
Perlette Seedless	Large, about 30% larger than Thompson Seedless. Green skin, flesh is firm and very good flavor. Wider climate range than Thompson, does well along the cooler coastal areas. Use as a table grape , or for raisins. Cane pruning	PS
Pinot Noir	Small black berries yielding famous French Burgundy wines. Requires cool summers, early harvest, cane pruning	P S
Ruby Seedless (King Ruby)	Medium crisp fruit with dark red skin. Sweet mild flavor. Vigorous growing vine and a heavy producer. Good for table grapes or raisins. Requires less heat than Thompson or Flame. Cane or spur pruning	S
Zinfandel	A good grape for red wines. Medium sized, round, juicy fruit. Reddish-black, early to midseason ripening. Prefers mild winters and cool summers, heavy bearing, Spur pruning	S
