

# 2020 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

2020 Fruit Tree List			
Item	Description	Chill Hrs	Loc.
<b>ALMONDS</b>			
All In One	The #1 almond for home & orchard, this tree produces heavy crops. Its large crops tend to stunt the tree, making it a semi-dwarf. Medium to large soft shelled fruit, sweet kernels. Ripens Sept. to Oct.	<400 hrs	P
<b>MULTIGRAFTS &amp; ESPALLIERS</b>			
Apple Espallier Anna	Same as Anna, but has several pre-formed horizontal	200 hrs	P
Apple Dorsett Golden	Same as Dorsett Golden, but has several pre-formed horizontal branches	100 hrs.	P S
Apple Espallier Fuji	Same as Fuji, but has several pre-formed horizontal branches	300 hrs.	S P
Apple Espallier 3 in 1	Probably Anna-Dorset Golden-Fuji		S P
Apple 6 in 1	6 low chill varieties		S P
Apple 4N1 Anna/Fuji/DG/G	Probably Anna-Fuji-Dorset Golden-Gala		S P
Apricot 4N1	Tomcot-Katy-Blenheim-Flavor Delight-Royal Rosa		S
Fruit Salad	Probably July Elberta Peach, Fantasia Nectarine, Babcock Peach, Santa Rosa Plum, Blenheim Apricot		S P
Peach 4N1	Multi-graft trees with mild climate peaches. Probably Mid Pride, May Pride, Desert Gold & Eva's Pride		S
Peach 4N1 Zaiger Pride	Eva's Pride, May Pride, August Pride, Mid Pride and June		S P
Pear Asian 4N1	Four varieties of Asian pears grafted on one tree		
Plum 4N1 Japanese	4-in-1 Japanese		P S
Showy Flowers + Fruit			S P
Zee Sweet Nuggets 4N1	Pluot with Splash, Geo Pride, Emerald Drop & Flavor		S P
<b>APPLES</b>			
Anna	Remarkable apple for mild winter areas. Great in So. California. It bears large crops of sweet, crisp fruit. Green fruit with red stripes. Good fresh or cooked. Ripens in June. Self-fruitful or pollinated by Dorsett Golden or Einshemer..	200 hrs.	P S
Beverly Hills	Medium size fruit with yellow skin and red blush or stripes. Crisp and juicy bears well in mild climate areas. Ripens late	300 hrs.	S P
Braeburn	Newer variety from New Zealand. Superb late season fruit, very crisp & tangy, more flavorful than Granny Smith. Excellent keeping apple. Green fruit with dark red blush.	<250 hrs	S
Buckeye Gala	stripe. It matures with other Gala selections and is comparable in size, firmness, fruit quality and storage life. The Buckeye Gala tree is a very precocious annual bearer with a vigorous, upright, semi-spur habit.	<250 hrs.	P
Dorset Golden	Outstanding sweet apple for warm winter areas. Firm, very flavorful, sweet like Golden Delicious. Yellow skin with an orange blush. Very low chill requirements. Ripens in June.	100 hrs.	S P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2020 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Einshemer	Fast-growing, self-pollinating variety that produces crisp yellow fruit. It requires fewer cold days than many other apple trees. Sweet flavor. Good pollinizer for Anna.	100 hrs.	S P
Fuji	Sweet, very crisp and flavorful, excellent keeper. Excellent pollenizer for other apples	300 hrs	P S
Gala	Crisp, good blend of sweetness and tartness. Early harvest	<500	P
Ghost	For the apple lover seeking a unique variety, the new Ghost apple is in a category by itself. With totally white skin, these white flesh apples hang on the tree like floating goblins. The sweet sub-acid flavor was a taste pleaser at several fruit tastings. A heat-loving apple, Ghost harvests at the beginning of July in central CA. Apple with midseason bloom required as pollenizer.	300-400 hrs	P S
Gordon	Popular low chill variety for So. Cal. Green skin overlaid with red. Good for both fresh eating and cooking. Ripens Aug to Oct. Self-fruitful.	400 hrs.	S
Granny Smith	Large, late, green, all-purpose. Crisp, tart, excellent keeper. Requires long summer, thrives in hot climates. Prolonged bloom: good pollenizer for other apples.	400 hrs	P
King David	Speculated to be a cross of Jonathan and Winesap. It is winey, rich, slightly spicy, and flavorful. Fruits never seem to drop and increase in brilliance of color as the season goes on. For best eating, should be picked when the red color becomes complete. Great for fresh eating, baking,	300 hrs.	P
Lady Williams	Medium to large in size, the skin is smooth and yellow-green with bright red streaking and white speckling, or lenticels. The flesh is yellow, crisp, and juicy with a central fibrous core encasing a few brown seeds. When sliced in half, the core forms a five-pointed star-shape that showcases each small seed. Firm, crunchy, and boasts a complex sweet and tart flavor with an acidic, cidery tang. Suited to warmer climates.	200-300 hrs.	P
Pettingill	Chance seedling discovered near Long Beach, CA., introduced in 1949. Large fruit with red over green skin, ripening late September to mid-October in coastal Southern CA. climates. Crisp and juicy, with a balance of sugar and acid.	300 hrs	S
Pink Lady (Crisps Pink)	Newer hot climate apple from Australia. Very crisp, sweet-tart distinct flavor. Good keeping apple. Skin is reddish-brown over green, with white stripe. White flesh resists	300-400 hrs	P S
Sundowner	Sister to the Pink Lady apple. Sweet, crispy white, excellent flavor. Late ripening, October on. <b>Self-fruitful</b>	200-300 hrs.	P S
Winter Banana	skin blushed with rosy pink. Crisp, tangy, juicy flesh is highly aromatic with a mild, banana-like flavor. Long time favorite dessert apple in CA's mild winter coastal climates. Good cider apple.	<400 hrs	S
<b>APRICOT</b>			

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2020 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Autumn Glo	A newer late season apricot with a sweet, slightly acid flavor. The fruit is good both fresh and dried. It is juicy and very aromatic. It will please the most critical of apricot lovers. Harvest is later, August. Self-fruitful.	300-400 hrs.	S
Blenheim	All purpose freestone, sweet, aromatic and very flavorful. Long time #1 apricot in Calif. It blooms early, good for canning and drying. Ripens in June & July. <b>Self-fruitful.</b>	<400 hrs	S P
Gold Kist	Excellent back yard apricot for warm winter climates. Freestone and very good quality. Heavy bearing tree. Ripens	300 hrs	P S
Royal Rosa	Extremely vigorous, more disease resistant than other apricots. Bearing young & heavy especially nice fruit. Sweet, low acid and fine flavor. Very early harvest. Ripens in May &	<500 hrs	S P
Tropic Gold	NEWER INTRODUCTION of a great new Apricot. This one does well in the warmer Southern California areas. The tree produces heavy crops which make the tree almost weeping. Ripens June to July. Bears young. <b>Self-Fruitful</b>	<350 hrs	P
<b>APRIUM</b>			
Cot-N-Candy Aprium	Wonderful new fruit from Zaiger Hybrids, early season harvest. White flesh is extra sweet and juicy with a plummy aftertaste. The fruit is about 2" to 2 1/2" in diameter on average. The tree is self-fruitful, no pollinizer needed.	<400 hrs	P S
Flavor Delight Aprium	Plum cross, resembles an apricot but has a distinctive flavor and texture all its own. High rating in taste test scores. One of the most flavorful early season fruits. Larger corps are born if pollinated by another apricot.	<300 hrs	S P
Summer Delight Aprium	Late producer, reliable producer, juicy, sweet apricot flavor.	<500 hrs	S P
<b>CHERRIES</b>	<i>NOTE: Most Cherries need colder climates, coldest inland and canyons or mountains. <b>Minnie Royal, Royal Lee, and Royal Crimson are very low chill .</b></i>		
English Morello	Late season tart cherry for baking, sometimes eaten fresh when fully ripe. Dark red to nearly black. Rounded head tree with drooping branches. <b>Self-Fruitful</b>	<500 hrs	P
Lapins	Newer variety from Canada. Dark red, sweet cherry is large & firm. <b>Self-fruitful.</b>	400 hrs	P S
Minnie Royal	Medium-size red cherry, firm with good flavor. A very productive variety with low chill requirements. <b>Pollinize with Royal Lee or Royal Crimson.</b>	200-300 hrs	S P
Royal Crimson	Cherry formerly known as 6GM25. Low chill, self fruitful cherry. An excellent pollenizer for Minnie Royal and Royal	200-300 hrs.	S P
Royal Lee	Large yellow cherry with more red blush than Rainier. Excellent flavor. <b>Pollinize with Minnie Royal or Royal</b>	300 hrs	P S
Royal Rainier	Large yellow cherry with more red blush than Rainier. Excellent flavor. Pollinate with Lapins, moderate chill hours.	500 hrs	P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

<b>FIG</b>	<i>Some figs may be potted. Some sources say there are more than 1,000 varieties of figs!</i>		
Black Jack	Large purplish black fruit with sweet juicy strawberry-red flesh. Fruit ripens in Aug. & Oct. Self-fruitful. Naturally semi	100 hrs.	P
Black Mission	This is the favorite fig tree. Medium to large fruit, has a purplish black skin with strawberry colored flesh. The flavor is very good. Fruit is good fresh, dried or canned. Large tree, good along the coast, does very well inland. Self-fruitful	100 hrs.	P S
Brown Turkey	Large bell shaped fruit has a brownish skin with pink flesh. Sweet, rich flavor best used fresh. Does well along the coast or inland. The tree is medium sized to large but can be pruned to just about any shape. Self-fruitful.	100 hrs.	P S
Celestial (Celeste)	Small to medium fruit. Violet to purplish-brown colored skin. Flesh is white, fading to rose at the center. Firm & juicy, sweetest of all. Excellent quality. Best to avoid extremes of heat & cold, likes moderate coastal climates. Two crops a	100 hrs.	S P
Excel	Yellow-green skin, amber flesh. Mild sweet, rich flavor. Produces two crops a year. Good fresh or in jams. Self-	100 hrs.	S P
Flanders	Skin is brownish-yellow with violet stripes, amber flesh. Strong fine flavor. Excellent all purpose fruit. Good spring crop. Good in southern California, coastal or inland. Self-	100 hrs.	S P
Janice - Seedless Kadota	Newer white fig, large, sweet & delicious. Light greenish-yellow fruit with practically no seeds. Prolonged harvest Aug.-Nov. Well suited to coastal & inland climates. Can be pruned to almost any shape. Self-fruitful.	100 hrs.	P S
Panache 'Tiger Fig'	Especially fine flavor. Small to medium sized fruit with green color skin and yellow 'Tiger' stripes. Strawberry pulp is blood-red in color. Extended harvest. <b>Self-fruitful.</b>	100 hrs.	S P
Peters Honey	Beautiful, shiny, greenish yellow fruit when ripe. Very sweet dark, amber flesh. High quality. Superb for fresh eating. Originated in Sicily <b>Self-fruitful</b>	100 hrs.	P
Violette de Bordeaux	Smaller fruit is purple-black in color. It has a "strawberry" pulp that has a distinctive sweet rich flavor. Excellent fresh or dried. Smaller tree can be container grown. <b>Self-fruitful</b>	100 hrs.	P S
White Genoa	Large fruit has a yellowish-green skin with yellow to light strawberry flesh. This fig has unusually few seeds. Use it fresh or for drying. Good coastal or inland. <b>Self-fruitful</b>	100 hrs.	S
<b>JUJUBE</b>			
GA 866	Fruit is large, elongated, & very high in sugar content. Sweet apple flavor is great when eaten fresh, candied or dried.	150 hrs	P
Sugar Cane	Extremely sweet fruit, like candy! Sometimes called "Chinese Date". Best grown inland where it is warmer. Partially self	150 hrs	P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2020 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

<b>Kiwi</b>			
Issai Self Fruitful	Fuzzless, small, fruit can be eaten like a grape without peeling. Very high in Vitamin C. New growth tender to frost, but recovers quickly. Self-fruitful.	300 hrs	P
Tomuri Male	Pollenizer for Vincent female. Does not bear fruit.	100 hrs	P
Vincent-Female	Vigorous vine that produces delicious, egg-sized fruit. Female fuzzy kiwi needs a male (Tomuri) kiwi for pollination.	100 hrs	P
<b>MULBERRY</b>			
Black - Dwarf	Fruit is large, resembling a blackberry, sweet and luscious. When not devoured fresh it is ideal to use in jams, wines and mulberry pies		P S
Cookes Pakistan	Sweet, flavorful, raspberry-tasting berries. King of the Mulberries. Non staining juice. Month long early summer harvest.	200 hrs	P
Persian Fruiting	staining juice. Month-long early summer harvest. Fruit used fresh and for pies, jams and jellies. Large, vigorous, disease-resistant tree.	Low	P
Persian White	Beautiful trees that produce abundant white, sweet and juicy fruits called toot.	Low	P
Tea's Weeping	Fast growing, heat-loving tree with blackberry-like fruit. Mature tree size 20 by 20 ft. Low chilling requirement.	Low	S P
<b>NECTARINE</b>			
Arctic Babe Dwf	Genetics, Arctic Babe is the first white-fleshed miniature nectarine. Super-sweet, large size fruit. Reaching only 4-6 ft., this tree is easy to thin and harvest, easy to cover to protect blooms from frost.	<700 hrs.	S P
Arctic Star White Subacid	Newer variety of low acid, super sweet white flesh. Rave reviews in trial taste tests. Beautiful dark red skin, snow-white semi-freestone flesh. Low winter chill. <b>Self-fruitful.</b>	300 hrs	S P
Desert Dawn	Proven heavy producer of delicious nectarines for warm winter western climates. Solid red skin, juicy yellow semi-freestone, rich flavor. Mid to late May. Self-fruitful.	250 hrs	S
Desert Delight	Superior low chill early season nectarine. Large bright red skin with yellow flesh. Rich, tangy flavor, well adapted to mild winter areas. Good along the coast & inland. This tree can be heavily pruned if you want to keep it under 10' tall.	100-200 hrs.	S P
Double Delight	Sensational fruit, consistently the best flavored yellow nectarine. Magnificent double pink blooms. Dark red skin, freestone fruit is sweet with unusually rich flavor. Always scores high in taste tests. The tree is heavy bearing. Ripens in	200 hrs.	P S
Honey Babe (DWF)			P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2020 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Necta Zee Miniature	Sweet, firm, flavorful, yellow freestone nectarine with beautiful red skin. Best self-fruitful miniature nectarine. Ripens mid June to early July. Strong, vigorous tree to 6 ft.	<400 hrs.	S P
Panamint	Attractive fruit has red skin with yellow freestone flesh. Heavy producing variety in mild winter areas. Intensely flavored, nice acid-sugar balance. Dependable longtime favorite. Ripens in July. Self fruitful.	250 hrs	S
Snow Queen	This nectarine has wonderful flavor and rates high in taste tests. Sweet & juicy, early season & freestone. A favorite in S. Calif. Because of the low chilling requirements. Ripens in	250 -300 hrs	S P
Spice Zee Nectaplum	The first Nectaplum from Zaiger Hybrids. Spice Zee packs a pile of amazing fruit into an attractive tree for the home gardener. It is slightly acidic and loaded with sugar giving it a spicy, sweet flavor. One can detect both Plum & Nectarine traits with ease. Along with great flavor, Spice Zee is a beautiful ornamental tree with tremendous spring bloom followed by dark red leaves in spring that mature to rich	200-300	PS
<b>PEACH</b>			
August Pride	Large all-purpose yellow freestone for mild winter climates. Sweet aromatic, rich flavor, one of the very best. Ripens in late July to Aug. Self-fruitful.	<300 hrs	S P
Babcock	Longtime favorite white-fleshed freestone peach. The skin has a red cheek. The fruit is medium size, on a heavily producing tree. Ripens in July. Self-fruitful	250-300 hrs	S
Bonanza Miniature	This is a true dwarf peach tree that will get to about 4-5' tall. Small & compact growing, shrub-like. Lots of leaves drooping from the short, stubby stems. Light pink blooms followed by medium sized fruit. Yellow skin with a red blush. Yellow freestone flesh with good flavor. Ripens in June. Self-fruitful	250 hrs	S
Bonita	Medium to large yellow freestone with red blush. Sweet, subacid, very flavorful. Proven variety for So. Calif., coast or inland.	<400 hrs.	S
Desert Gold	Very early ripening: May in Southern Calif./Arizona. Tree-ripened fruit has good flavor and sweetness for such an early variety. Yellow clingstone. Heavy bearing.	<200 hrs.	P
Donut (Stark Saturn) (Saucer Peach)	Sometimes called "Peento Peach", unique white fleshed fruit with a shrunken center, somewhat shaped like a doughnut. Sweet, mild flavor described as some as almost almond-like. Ripens in July. Self-fruitful	200-300 hrs	P S
Eva's Pride	Delicious fine flavored peach with a very low chilling requirement. Medium to large size yellow freestone, recommended as an early season peach for moderate	100-200 hrs.	P S

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2020 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Flordaprince	From Florida, successfully grown in So. Calif./Arizona. Larger fruit than Desert Gold, more tolerant of desert heat, better flavor. Semi-freestone when fully ripe. Ripens early May in	150 hrs	S
May Pride	Very early peach for warm winter climates. Ripens in May, about with Desert Gold. Delicious, sweet and tangy, semi-freestone when fully ripe. Very large for such an early peach.	150-200 hrs	S P
Mid Pride	Best yellow freestone for warm winter climates of So. Calif. This variety also has excellent flavor and dessert quality. Ripens in July. Self-fruitful.	250 hrs.	S P
Pix Zee Miniature	Large fruit ripens mid to late June in Central Calif., two weeks before Honey Babe. Delicious, firm, yellow freestone, beautiful red over orange skin. Vigorous to 6 ft. Self-fruitful.	350 hrs.	S
Red Baron	Beautiful double red blooms. This is the best of both worlds. Excellent showy double red blooms followed by large, juicy, firm, richly flavored freestone fruit. Ripens in July. Self-	250-300 hrs	S P
Saturn	Massive bloomer with double pink blooms. Flowering and fruiting peach. Large double pink blooms followed by large yellow freestone fruit which is sweet & juicy. The fruit has a fine flavor. Long time favorite in this area. Ripens in July. Self-	250-300 hrs	P
Sauzee Swirl	Beautiful white flesh with red marbling and a pronounced flavor . Medium sized clingstone fruit harvests in mid to late May, a full month before Stark Saturn. The ripe fruit is distinctively ornamental hanging in the tree, and beautiful	400 hrs.	P S
Tropic Snow	Delicious, white low chill freestone, great for warmer winter areas. Superb flavor with a nice balanced acid-sugar blend. Showy blossoms in spring. Very low chill requirements. Self-	200 hrs	S P
<b>PEAR</b>			
Fan-stic	Large, crisp, juicy fruit. Resistant to fireblight. Creamy yellow skin with slight blush. Consistant bearing tree. Ripens August to Sept. Self fruitful.	150 hrs.	P
Flordahome	Low chill pear from Florida. Very nice quality; sweet, smooth textured, juicy, flavorful. Harvest July/August Partly Self-fruitful another variety of pear planted near by would	less than 400 hrs	S
Hood	Large smooth yellow-green skin pear. Buttery textured flesh containing a few small seeds. It has a sweet, mild flavor. Best if pollinated by other pears. Interfruitful with Flordahome. Resistant to fireblight.	100-200 hrs	P
Keiffer	Medium-large. Late season. Sprightly flavor, coarse texture. Great for canning and cooking. Resists fireblight, tolerates hot areas. Dependable producer. Self-fruitful	200-300 hrs	P S
20th Century	Juicy, sweet, mild flavored fruit is crisp like an apple. Keeps well. Easy to grow, heavy bearing small tree. Self-fruitful or pollenized by Shinseiki, Bartlett or other	300-400 hrs.	P
<b>PERSIMMON</b>			

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2020 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Chocolate	Small to medium size, oblong, bright red skin. Sweet, spicy, firm, brown flesh, superb flavor the choice of connoisseurs. Astringent until ripe. Self-fruitful.	200 hrs.	P S
Coffee Cake "Nishimura Wase"	Unique spicy sweet, non-astringent, it can be eaten when still firm. Hardy, attractive tree usually free of pests and disease. Pollinize with Goshō or Chocolate. Needs pollinizer	<200 hrs	P S
Fuyu (Jiro) "Apple Persimmon"	Rounded flattened fruit. Reddish-orange skin. Non astringent, bears well as a young tree and is a heavy producer. This one does not have male flowers so it will have fewer seeds unless planted with other Persimmons. Ripens in Nov.	200 hrs.	P S
Giant Fuyu	Larger than Fuyu. Not as flat as Fuyu. Crunchy when ripe like Fuyu. Sweet, flavorful, non astringent. Easy to grow and does well in cool or hot climates. Fall harvest. Self-fruitful	200 hrs.	P S
Hachiya	Very large oblong fruit with rather a short point, acorn shape. Skin is bright orange-red covered with dark blotches. Large & best cooking quality. The tree is vigorous growing and upright with a nice shape. Astringent until soft ripe. Best in warm areas. Harvest in Nov. Self-fruitful.	200 hrs.	P S
Izu	Very sweet, tasty, non-astringent fruit ripens about three weeks before Fuyu. Medium to large size, round shape. Relatively small tree, good choice for backyard persimmon.	100 hrs	P
Maru	Medium sized, orange-red , round fruit, very sweet. Beautiful glossy skin. Rich flavor excellent quality. If cross-pollinized flesh is dark cinnamon color, seeded and non-astringent. Ripens Oct to Nov. Self-Fruitful	200 hrs.	P S
<b>PLUM</b>			
Beauty	Japanese variety. Sweet, flavorful, more widely adapted than Santa Rosa. Red over yellow skin, amber flesh streaked red. Ripens in June. Self-fruitful.	250 hrs	P S
Burgundy	Maroon-colored skin and semi-freestone flesh. Sweet with little or no tartness and very pleasing mild flavor. Rates high in taste test scores. Ripens July & Aug. Self-fruitful.	300 hrs	P S
Green Gage	Small to medium-sized, richly flavored & very sweet. Excellent fresh and for cooking.		S
Hollywood	Delicious blood red flesh & skin, low chill, good commercial variety. Low chill. Highly ornamental with burgundy foliage and lots of blooms in early spring. Self-fruitful	300-400 hrs	S
Mariposa (Improved Satsuma)	Larger red fleshed, sweet & juicy. The fruit is firm and delicious. Small pit, nearly freestone. Mottled maroon over green skin. Use fresh or cooked. Very low chill hours. Ripens in Aug. Pollinate with Catalina, Nubiana or Santa Rosa	250 hrs	S
Methley	Juicy sweet red flesh, mild flavor. Reddish-purple skin. Attractive tree and very heavy bearing. Ripens in June. Self-	250 hrs	S P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2020 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Santa Rosa	The most popular plum in Calif. Juicy, tangy & flavorful. Large, oval purple-red skin with amber flesh, tinged with red. Pleasing tart flavor. Ripens in June. Self-fruitful.	300 hrs	S P
Satsuma	Large plum with dark, solid red skin & flesh. The firm, juicy fruit has an excellent sweet flavor, great for fresh eating, cooking, canning, or preserves. Ripens in late July into August. Use another plum tree for pollination such as Santa	300 hrs	P
Weeping Santa Rosa	Large oval fruit with purplish-red skin. Firm yellow flesh. Rich pleasing tart flavor. The tree is semi-dwarf in habit with a graceful, weeping shape. This tree can also make a very attractive espalier. Ripens in July. Self-fruitful.	200-400 hrs.	P
<b>PLUERRY, PLUMCOT &amp; PLUOT</b>			
Pluerry 'Candy Heart'	New for 2016, Japanese plum and sweet cherry parentage. Sub acid, sweet flavor. Pollinize with Sweet Treat or	500-600	P S
Pluerry 'Sugar Twist'	Harvests a month earlier than Sweet Treat. This red skin and yellow fleshed Pluerry has the sugar sweet taste of a ripe cherry with that twist of plum you expect in this fruit type. Pollinize with Flavor King or Emerald Beauty.	500-700 hrs.	S
Pluerry 'Sweet Treat'	Taste test winner. Creamy white & red fleshed freestone with wonderful plum-apricot flavor. Skin is greenish-yellow with red spots, turning to maroon and yellow dapple. Ripens in August. Pollinate with Santa Rosa, Burgundy or Supreme	400 hrs	P S
Plumcherry 'Flavor Punch'			P S
Dapple Dandy Pluot	Sold in stores as "Dinosaur Egg®," the large, firm Dapple Dandy Pluot® interspecific plum has a distinctive skin color that is pale green to yellow with red mottling. Offers a spicy, plum-apricot flavor and a good acid to sugar balance. Pollinate with Flavor Supreme, Santa Rosa, or Burgundy.	400-500 hrs.	S P
Dapple Supreme	Darker red flesh reminiscent of a Flavor Supreme. Dapple Supreme ripens alongside Early Dapple in the last two weeks of June with good size & appealing eating qualities. Flavorosa	300 hrs.	P S
Emerald Drop Pluot	Medium to large fruit with green skin and yellow orange flesh. Early picked fruit is firm yet juicy sweet. If left on the tree a little longer it turns greenish-yellow with a honey-like orange flesh. Ripening time is July and August. Pollinize with Flavor Grenade Pluot or Santa Rosa Plum	400 hrs	S P
Flavor Grenade Pluot	Elongated green fruit with a red blush. Crisp texture and explosive flavor. A taste test winner. Can hang on the tree for 4-6 weeks. Pollinate with Flavor King, Dapple Dandy, or Emerald Drop Pluots, or Santa Rosa Plum.	<400 hrs	S P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2020 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Flavor King Pluot	Unique plum-apricot hybrid with sensational bouquet and sweet, spicy flavor. Reddish-purple skin with cream flesh. The tree is naturally semi-dwarf. Ripens in Aug. Pollinate with Santa Rosa, Late Santa Rosa or Flavor Supreme or Dapple	<400 hrs.	S P
Flavor Queen Pluot	Another newer plum-apricot cross. Candy-like sweetness, wonderfully pleasing flavor. Greenish-yellow skin, amber flesh. Ripens in Aug. Pollinate with Dapple Dandy pluot or Flavor Supreme Pluot. Not Pollinized by Flavor King Pluot	400 hrs	S
Flavorosa Pluot	This was introduced in 2003. Dark purple-red skin. Deep red flesh. Very juicy sweet flesh. Lower chill than most of this one. Ripens in May. Pollinize with Emerald Drop Pluot or	300-400 hrs.	S
Splash Pluot	Small to medium-sized red-orange colored fruit, with very sweet orange flesh. Consistently among the highest scoring varieties at Dave Wilson formal fruit tastings. Round to heart-shaped fruit is excellent eaten fresh, dried or in desserts. Pollinized by Santa Rosa or Flavor Grenade.	400 hrs	P
<b>POMEGRANATE</b>	<i>Most pomegranate trees come in pots</i>		
Ariana	Good for hot areas. Tiny, soft seeds, mild acidity and sweetness. Rated as one of the best tasting. Self fruitful.	100 hrs.	P
Desertnyi	A real dessert treat. Light orange rind contrasted by dark red arils makes for a unique look. Excellent sweet-tart balance with citrus overtones. Mature fruit has a firm texture and a flavor reminiscent of orange juice. Very soft edible seed. Self	200 hrs.	P
Eversweet	Very sweet , virtually seedless fruit. Red skin, clear (non-staining) juice. It does well on the coast & equally well inland. It grows into a tall arching shrub of about 8'-10' tall. You can also train it into a small tree or espalier it as well. Large, showy orange blooms. Harvest late summer through	150 hrs	P
Grenada	A darker, less tart bud sport of Wonderful. Can be grown as a bush or in tree form. Harvest 30 days before Wonderful. Long-lived, any soil. Self-fruitful.	200 hrs.	P
Parfianka	From Turkmenistan Dr. Levin Collection. Fruit is large and highly colored with bright red skin. Small edible seeds, wonderful sweet-tart taste. The fruit is considered very high	<200 hrs	S P
Red Silk	Medium to large fruit, sweet berry flavor with great acid-sugar balance. Red silky exterior, firm but sweet edible seeds. Eat fresh or use in cooking. The plant is semi-dwarf and sets large crops of fruit. Self-fruitful	<200 hrs	S
Sweet	Sweeter than Wonderful, more widely adapted to cool summer climates. Small, glossy leafed ornamental tree with showy orange-red blooms in late spring. Very suitable for espalier and container plantings. Fruit can be stored for about 2 months. Ripens in Sept. Self-fruitful	100 hrs.	S P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

# 2020 Fruit Tree List

Note: This is what was ordered inventories may change based on actual availability at shipping time.

Wonderful	Extra large purple-red skin fruit with delicious tangy flavor. Best variety for hot inland climates. Bright red-orange blooms, makes a nice ornamental too. The most well know.	150 hrs	P S
<b>QUINCE</b>			
Smyrna	Extremely large fruit. Light yellow flesh, bright yellow skin. Attractive tree has dark green foliage and showy blooms. Self	300 hrs.	P S
<b>GRAPES</b>	All of our grapes are self fruiting and require about 100 hours	100 hrs	
Black Monukka Seedless	Large, purplish-black, sweet, crisp fruit. Does not require as much summer heat as Thompson Seedless. Use fresh or dry for raisins. Cane or spur pruning.	100 hrs	S P
Cabernet Sauvignon	Late season red wine grape. Small black strongly flavored berry. Vigorous upright vine. Cane pruning	100 hrs	P S
Canadice	Firm, fully ripe red grapes, pleasant tang, tender skin.	100 hrs	P
Chardonnay	Most popular green-skinned grape in making white wine. A medium producing grape with average sized clusters and berries. It ripens earlier than most of the red varieties which helps it be less susceptible to late rains and rot	100 hrs	S
Concord Seedless	American grape, a sport of Concord. Berries very similar to Concord but seedless (or seeds are very rare). Bluish-black skin, green flesh, distinctive Concord flavor. Cane or spur	100 hrs	S P
Flame Seedless	Medium size fruit with red skin & firm flesh. A good eating grape. Very productive. Use fresh or for raisins. Likes hot summer heat. Cane or spur pruning	100 hrs	S P
Golden Muscat	American-European hybrid. Large egg-shaped berries are pale golden yellow when ripe. Highly productive, good in coastal areas as well as in warm interior areas. Cane pruning.	100 hrs	S P
Himrod Seedless	Medium sized green seedless grape. Good for table uses, holds well on the vine. This grape is a better choice than Thompson Seedless along the coast. It does not require the	100 hrs	P S
Interlakken	Hybrid of Thompson and American. Sweet, crisp. Needs less heat than Thompson.	100 hrs	P
Lady Finger	White, sweet-tart, juicy grapes.	100 hrs	P
Merlot	Blue to black fruit, used for distinctive red wines. Best quality	100 hrs	S
Perlette Seedless	Large, about 30% larger than Thompson Seedless. Green skin, flesh is firm and very good flavor. Wider climate range than Thompson, does well along the cooler coastal areas. Use as a table grape, or for raisins. Cane pruning.	100 hrs	S
Pinot Noir	Small black berries yielding famous French Burgundy wines. Requires cool summers, early harvest, cane pruning	100 hrs	S
Princess	White, mid season grape. Vigorous grower, rivals Thompson. Large fruit, slight Muscat flavor, seedless.	100 hrs	P S
Ruby Seedless (King Ruby)	Medium crisp fruit with dark red skin. Sweet mild flavor. Vigorous growing vine and a heavy producer. Good for table grapes or raisins. Requires less heat than Thompson or Flame.	100 hrs	S

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

Syrah	Dark skin, develops peppery and herbaceous notes with age.	100 hrs	S
Zinfandel	A good grape for red wines. Medium sized, round, juicy fruit. Reddish-black, early to midseason ripening. Prefers mild winters and cool summers, heavy bearing, Spur pruning	100 hrs	S P
<b>BLUEBERRIES</b>	<i>Note: Most Blueberries will produce repeat crops nearly all year long here, in our mild climate. Removing the fruit the first year is recommended to promote better vigor and larger plants. They like a rich 'acid' soil like Camellias. You can use a 'Camellia Mix' when you plant, or lots of peat moss. Plants may not go completely dormant in our</i>		
Emerald	Abundant crops of very large berries with a mild, sweet flavor. Moderate growth to 5-6'. Potted.	250 hrs	P S
Jelly Bean	Large, flavorful blueberries that taste like sweet homemade blueberry jelly. The foliage has unique, elongated green leaves with highlights of red in cooler climates. Deciduous.		S
Jubilee	Outstanding flavor for this early season blueberry. Fruit is medium to large, light blue. Consistently productive bush, even in less than optimum blueberry sites. From USDA breeding program. Upright bush 5' to 6' tall, early season	400 hrs	P
Misty	Early ripening, quite vigorous growing, does very well along the coast and with inland heat. The fruit has excellent flavor and has a very low chill requirement.	150 hrs	S
O'Neal	Large firm, very sweet fruit. Outstanding newer variety from N. Carolina State Univ. and USDA breeding program. Good heat tolerance. Yields comparable with the best Northern High Bush varieties. Self-fruitful but produces better when planted with other varieties. Upright growth to 5'-6' tall.	200 hrs	P S
Peach Sorbet	Compact blueberry with stunning peach, pink, orange and emerald green leaves. White bell-shaped flowers appear in spring, leading to an abundant summer crop of blueberries. In most climates, this plant will keep its leaves throughout winter and turns a rich eggplant purple.	300 hrs	S
Pink Icing	Breathtaking foliage colors and large, robust flavored berries. Spring foliage has many shades of pink mixed with blue and deep greens, and turns a stunning iridescent turquoise blue	500 hrs	S P
Pink Lemonade	Compact, pink blush fruit, low chill.	300 hrs.	P S
Sharp's Blue (Sharpblue)	Number one Southern High Bush planted in Florida. Fruit is medium size, medium blue in color. Average firmness with good flavor. It grows to about 4' to 6' tall. Nice red foliage in	150-200 hrs	P S
South Moon	Large, firm excellent berries that have superb flavor. The plant is upright & vigorous. It prefers light sandy, good draining soil and does well in So. Calif, inland & coastal.	200-300 hrs	S P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

Arbosana	Mainly grown as a complement to Arbequina, this variety has a more robust flavor than Arbequina. A compact grower that is moderately frost hardy. Fruit matures about 3 weeks later than Arbequina. Self-fruitful but produces higher yields with a pollinizer such as Arbequina.		P
Koroneiki	Greek variety, originally cultivated on the plains, lower hillsides and coastal areas of Crete where the climate is relatively warm. Adapts well in high density orchards, early producer. Very small fruit size. Excellent oil quality with very high polyphenols. Fruit yield is high with a slight tendency for alternate bearing. Higher yields with Arbequina or ...		P
Manzanillo	Classic table olive. It's a large variety that can be eaten both green and ripe black. This variety becomes fruitier and less bitter as it ripens. Moderately cold hardy. Self-fruitful but produces higher yields with a pollinizer.		P
Mission	The classic California olive, this variety is the most versatile for the home garden. Whether for curing or oil production, Mission is considered a true edible ornamental. Colder hardier than most olive varieties. Self-fruitful but produces		P
Picual	Tasty olive for table use and for oil. Self-fertile. Bears great tasting medium olives.		P
