

## Trees With Minimal Problems

This List Can Be Used As A Guide To Select Trees Suitable For Your Particular Situation. Not All Trees Available To Us Are On This List And There May Be Other Trees That Could Be Considered, Depending Upon Your Growing Conditions. Some Trees Were Left Off This List Because They May Get Very Large, Such As Eucalyptus Citridora, Or They May Have Other Problems Like Limbs Dropping As A Grevilla Robusta Is Prone To Do.

We Included Lagerstromia On The List Because It Is A Beautiful Tree Inland, But Along The Coast You May Have Mildew Problems. There Are Many Things To Consider When Selecting The Right Tree For Your Yard. There May Be Other Palms, Sycamore, Ficus And Coral Trees You Might Want To Consider.

Height May Vary According To Water, Fertilizer, Soil Conditions, And Seedling Varieties. Most Of These Trees Will Not Pose A Problem With Sidewalks Or Driveways If Deeply Watered And The Water Can Soak Down Deep. Hard Soil And Shallow Watering Habits Can Cause Surface Rooting On Almost Any Tree, Which May Be A Problem. Root Pruning Can Help Eliminate Problems In These Areas Especially Near Sidewalks And Driveways. There Are Also "Root Barrier" Systems If You Have Concerns. If You Have Any Other Questions, Most Of These Trees Are Listed In "Sunset Western Garden Book" Or Ask One Of Our Professionals. Most Of These Trees Can Be Kept Smaller By Pruning With The Exception Of Palms.
