

2024 Bareroot Fruit Trees

Note: This is what was ordered as of November, 2023. Inventories may change based on availability at shipping time.

**May not be available or in short supply.

Item	Description	Chill Hours	Location
ALMOND			
All In One	No.1 almond for home orchards. Heavy crops of soft shell nuts with sweet, flavorful kernels. Hot summer required to ripen.	300-400 hrs.	P
FIG	<i>Some figs may be grown in containers. Some sources say there are more than 1,000 varieties of figs!</i>		
Black Mission	This is the favorite fig tree in the area. Medium to large fruit, has a purplish black skin with strawberry colored flesh. The flavor is very good. Fruit is good fresh, dried or canned. Large tree, good along the coast, does very well inland. Self-fruitful.	100 hrs.	P S
Brown Turkey	Large bell shaped fruit has a brownish skin with pink flesh. Sweet, rich flavor best used fresh. Does well along the coast or inland. The tree is medium sized to large but can be pruned to just about any shape. Self-fruitful.	100 hrs.	P S
Celestial (Celeste)	Small to medium fruit. Violet to purplish-brown colored skin. Flesh is pink. Firm & juicy. Excellent quality. Self-fruitful.	100 hrs.	P
Excel	Yellow-green skin, amber flesh. Sweet, rich flavor. Good fresh or in jams. Resistant to splitting. Self-fruitful.	100 hrs.	S
Flanders	Skin is brownish-yellow with violet stripes, amber flesh. Strong fine flavor. Excellent all purpose fruit. Good spring crop. Good in southern California, coastal or inland. Self-fruitful.	100 hrs.	P S
Janice – Seedless Kadota	White fig, large, sweet & delicious. Light greenish-yellow fruit with practically no seeds. Prolonged harvest Aug.-Nov. Well suited to coastal & inland climates. Can be pruned to almost any shape. Self-fruitful.	100 hrs.	P S
Kadota	Large, light greenish yellow skin, amber flesh. Needs hot summer to ripen.		P
Panache 'Tiger Fig'	Especially fine flavor. Small to medium sized fruit with yellow color skin and green 'Tiger' stripes. Strawberry pulp is blood-red in color. Self-fruitful.	100 hrs.	P S
Violette de Bordeaux	Smaller fruit is purple-black in color. It has a "strawberry" pulp that has a distinctive sweet rich flavor. Excellent fresh or dried. Smaller tree can be container grown. Self-fruitful.	100 hrs.	P S
White Genoa	Large fruit has a yellowish-green skin with yellow to light strawberry flesh. This fig has unusually few seeds. Use it fresh or for drying. Good coastal or inland, but great for cool coastal locations. Self-fruitful.	100 hrs.	P S
KIWI			
Vincent – Female	Vigorous vine that produces delicious, egg-sized fruit. Female fuzzy kiwi needs a male (Tomuri) kiwi for pollination.	100 hrs.	P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

**May not be available or in short supply.

MULBERRY			
Black – Dwarf	Bush form produces blackberry-like fruit continuously throughout the season. Grows only to 6'-8' in a container. 10'-20' if planted in ground.	200 hrs.	P S
NECTAPLUM			
Spice Zee	White-fleshed, nectarine x plum. Delicious fruit. Self-fruitful.	200-300 hrs.	P
POMEGRANATE			
Ariana	From Turkmenistan Dr. Levin Collection. Fruit is large and highly colored with bright red skin. Small soft, edible seeds, wonderful sweet-tart taste. The fruit is considered very high quality. Self-fruitful.	100 hrs.	P
Eversweet	Very sweet , virtually seedless fruit. Red skin, clear (non-staining) juice. It does well on the coast & equally well inland. It grows into a tall arching shrub of about 8'-10' tall. You can also train it into a small tree or espalier it as well. Large, showy orange blooms. Harvest late summer through fall. Self-fruitful.	150 hrs.	P
Grenada	This is a sport from Wonderful. Fruit is darker, less tart than Wonderful. Self-fruitful.	150 hrs.	P**
Parfianka	Large size red fruit is sweet with a hint of acidity. Vigorous upright plant sets a heavy crop dependably. Maintain at any height with summer pruning. Consistently receives the highest praise for overall flavor. Great for juice or fresh eating.	100-200 hrs.	P S
Red Silk	Medium to large fruit, sweet berry flavor with great acid-sugar balance. Red silky exterior, firm but sweet edible seeds. Eat fresh or use in cooking. Semi dwarf and sets large crops of fruit. Self fruitful.	<200 hrs.	S
Sweet	Sweeter than Wonderful, more widely adapted to cool summer climates. Small, glossy leafed ornamental tree with showy orange-red blooms. Very suitable for espalier and container plantings. Fruit can be stored for about 2 months. Ripens in Sept. Self-fruitful.	100 hrs.	P S
Wonderful	Large purple-red skin fruit with delicious tangy flavor. Best variety for hot inland climates. Bright red-orange blooms, makes a nice ornamental too. The most well know. Ripens in fall. Self-fruitful.	150 hrs	P S
GRAPES			
<i>All of our grapes are self fruiting and require about 100 hours of chill.</i>			
Black Monukka Seedless	Large, purplish-black, sweet, crisp fruit. Does not require as much summer heat as Thompson Seedless. Use fresh or dry for raisins. Cane or spur pruning.	100 hrs.	S

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

**May not be available or in short supply.

Blueberry Grape	Small to medium grape, a smooth purple skin and clear green flesh with rich strong flavor hinting very much like blueberry flavor and aroma.		P
Cabernet Sauvignon	Late season red wine grape. Small black strongly flavored berry. Vigorous upright vine. Cane pruning.	100 hrs.	P S
Canadice	Early ripening, seedless grape derived from Himrod. Extremely winter hardy. Self fruitful, spur prune.	100 hrs.	P
Chardonnay	Most popular green-skinned grape in making white wine. A medium producing grape with average sized clusters and berries. It ripens earlier than most of the red varieties which helps it be less susceptible to late rains and rot.	100 hrs.	P S
Concord, Eastern	Medium-size clusters of edible, highly aromatic, blue-black grapes. Harvest late August to September. Skin separates easily from the fruit. This twining vine works well as a screen for arbors or trailing along fences.	100 hrs.	P
Concord Seedless	Slightly smaller clusters and berries than regular Concord.	100 hrs.	P S
Crimson Seedless	Late season grape. Medium size, firm, very sweet, excellent quality. Cane prune, self fruitful.	100 hrs.	P
Flame Seedless	Medium size fruit with red skin & firm flesh. A good eating grape. Very productive. Use fresh or for raisins. Likes hot summer. Cane or spur pruning.	100 hrs.	P S
Golden Muscat	American-European hybrid. Large egg-shaped berries are pale golden yellow when ripe. Highly productive, good in coastal areas and in warm interior areas. Cane pruning.	100 hrs.	P S
Himrod Seedless	Medium sized green seedless grape. Good for table uses, holds well on the vine. Better choice than Thompson Seedless along the coast. Does not require the heat Thompson needs for best production. Cane pruning. Very productive.	100 hrs.	P S
Interlaken	Hybrid of Thompson Seedless & American grape. More cold hardy than Thompson. Fruit is sweet, crisp. Self fruitful, cane prune. Ripens with less heat than Thompson requires.	100 hrs.	P
Merlot	Blue to black fruit, used for distinctive red wines. Best quality in cooler regions. Medium to large clusters of fruit, ripen in Sept. to Oct. Cane or spur pruning.	100 hrs.	P S
Pinot Noir	Small black berries yielding famous French Burgundy wines. Requires cool summers, early harvest, cane pruning.	100 hrs.	P S
Princess	Large white, mid season grape. Vigorous grower, rivals Thompson.	100 hrs.	P S
Syrah	Dark skin, develops peppery and herbaceous notes with age.	100 hrs.	P S
Zinfandel	A good grape for red wines. Medium sized, round, juicy fruit. Reddish-black, early to midseason ripening. Prefers mild winters & cool summers, heavy bearing, spur pruning.	100 hrs.	P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

BERRIES			
BLACKBERRIES			
Baby Cakes	New, thornless dwarf blackberry with compact habit that makes it perfect for patio pots. In most regions, this blackberry will produce twice in one season. Produces on second-year canes.	400 hrs.	P S
Black Satin Thornless	Produces large berries, is disease resistant. Semi trailing vine with minimal suckering. Midseason harvest. Self fruitful but more productive with a second variety.	300-400 hrs.	P S
Kiowa	Large and thorny. Berries are 3" long, firm and highly flavored. Upright growth requires no support.	200 hrs.	P S
Marion	Thorny, trailing blackberry suited for the fresh market. Produces on second year canes.	400-500 hrs.	P S
Navaho Thornless	Medium sized fruit on the first fully erect self-supporting thornless. Superior fruit quality, less tart than other thornless	300-500 hrs.	P S
Olallie	Large (1 1/2" long 3/4" thick) shiny black firm berry. Sweeter and less tart than others. Vigorous growing and very productive. Commercially planted in California for market. Ripens June to July.	Low	P
Triple Crown	Large, glossy black, juicy and flavorful. Good for fresh eating, it also makes delicious pies, sauce and jam. Vigorous and easy to harvest.		P S
BOYSENBERRY			
Boysenberry Thornless	Few thorns. Very large berry, intense tangy, sweet flavor. Excellent quality and pleasant aroma.	Low	P S
Boysenberry Thorny	Same as above.		P
GOJI BERRY			P S
RASPBERRIES			
Baba Berry	Large, sweet, good for mild winters & hot summers. Self fruitful.	Low	P S
Caroline	Summer through fall bearing, red berry with exceptional flavor. Primocane type, produces on new wood. Large yields.		P
Fall Gold	Excellent flavor. It has a golden yellow fruit that ripens starting in June but the heavier crops come in Aug. & Sept. Use them fresh, frozen or for preserves. Self fruitful.	150-200 hrs	P S
Nova	Near-thornless variety, everbearing variety that is easy to grow & easy to pick. Produces firm, medium, bright red, medium sized fruit with a slightly tart flavor.	Low	P
Raspberry Shortcake	Dwarf, thornless bush raspberry thrives in a patio pot or in the landscape. It produces an abundant crop of sweet raspberries in midsummer. Self-fruitful.	<500 hrs.	P

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

**May not be available or in short supply.

BLUEBERRIES	<i>Note: Most Blueberries produce repeat crops nearly all year long in our mild climate. Removing the fruit the first year is recommended to promote better vigor & larger plants. Provide rich, 'acid' soil like Camellias. Use a 'Camellia Mix' when you plant, or lots of peat moss. Plants may not go completely dormant in our winters. All self fruitful but produce larger crops when planted with another variety.</i>		
Emerald	Abundant crops of very large berries with a mild, sweet flavor. Moderate growth to 5-6'. Potted.	250 hrs.	P S
Jelly Bean	Large, sweet, flavorful blueberries in mid-summer. Foliage has distinctive elongated, green leaves with highlights of red in cooler climates. Mounded, compact growth habit to 1-2 ft., well suited to patio container growing or decorative use in landscape.	1000 hrs.	S
Jewell	Southern highbush, exceptional growth and high yields with a tangy sweet flavor. Self fruitful.	200 hrs.	P
Jubilee	Outstanding flavor for this early season blueberry. Fruit is medium to large, light blue. Consistently productive bush, even in less than optimum blueberry sites. From USDA breeding program. Upright bush 5' to 6' tall, early season ripening.	400 hrs.	P
Misty	Early ripening, quite vigorous growing, does very well along the coast and with inland heat. The fruit has excellent flavor and has a very low chill requirement.	150 hrs.	P S
O'Neal	Large firm, very sweet fruit. Outstanding newer variety from N. Carolina State Univ. and USDA breeding program. Good heat tolerance. Yields comparable with the best Northern High Bush varieties.	200 hrs.	P S
Peach Sorbet	Compact-growing blueberry is a stunner: leaves of peach, pink, orange and emerald green. White bell-shaped flowers in spring, followed by flavorful, sweet blueberries in summer. Mounded shape, growing to 1 1/2 -2 ft. In most climates, the leaves are held throughout winter, turning to a rich purple color.	300 hrs.	S
Pink Icing	Distinctive foliage colors and large, richly flavored berries. In spring, the foliage has many shades of pink, mixed with blue and deep greens. The leaves turn a showy iridescent turquoise blue in winter. Mounded, compact growth habit to 3-4 ft. Adapted to patio container growing or landscape use for year-round color.	500 hrs.	P S
Pink Lemonade	Compact, pink blush fruit, low chill.	300 hrs.	P S
Reveille Southern	Southern Highbush. Midseason. DWN house favorite. This berry has pleasing crunchy texture and excellent flavor.	400-500 hrs.	P
Sharp's Blue (Sharpblue)	Dime size fruit. Nearly evergreen here with fruit nearly year round!	200 hrs.	P S

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.

Note: This is what was ordered as of November, 2023. Inventories may change based on availability at shipping time.

**May not be available or in short supply.

South Moon	Large, firm excellent berries that have superb flavor. The plant is upright & vigorous. It prefers light sandy, good draining soil and does well in So. Calif, inland & coastal. Ripens early season.	200-300 hrs.	P S
Sunshine	This one performs for gardeners from San Diego to Seattle. Evergreen compact plant to about 3' tall. Heavy crops & low chilling requirements, yet frost hardy. Tolerates a higher pH than most other blueberries. Self-fruitful.	150 hrs.	P S
OLIVES			
Arbequina	Mild and fruity, low bitterness. High oil content. Self fruitful but produces higher yields with a pollenizer such as Arbosana. California's top variety for oil production.	<300 hrs.	P
Arbosana	Mainly grown as a compliment to Arbequina. More robust flavor than Arebequina. Fruit matures about 3 weeks later too. Self fruitful but produces higher yields with a pollenizer such a Arbequina.	<300 hrs.	P
Frantoio	Grows well in milder climates, but it is not as tolerant of heat and cold as Spanish olive cultivars. This olive tree grows with moderate speed and has an airy, even wispy, canopy.	<300 hrs.	P
Koroneiki	Peppery flavor and used mainly as a blending varietal. Frost tender, self fruitful but produces higher yields with pollenizers such as Arbequina.	<300 hrs.	P
Manzanillo	Manzanillo is the classic table olive. It's a large variety that can be eaten both green and ripe black. This variety becomes fruitier and less bitter as it ripens. Moderately cold hardy. Self-fruitful but produces higher yields with a pollenizer.	<300 hrs.	P
Mission	Classic California Olive, most versatile for the home garden. Use for curing or oil production. Colder hardy than most varieties. Self fruitful but produces better with a pollenizer.	<300 hrs.	P
HOPS			
Centennial	Imparts outstanding citrusy, flowery flavor and aromatics to your artisanal home brew. Prolific, vigorous, winter-hardy plants thrive in the full range of U.S. regions.		P S
ORNAMENTALS			
Quince, Flowering Texas Scarlet	Orange-red flowers in spring, Round-shaped shrub. Height to 3 ft.		P S

Chill hours listed are approximate, many trees will perform well with less than stated chill hours.
